Question Type: MultipleChoice

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

- * Separate realms
- * Deferent code bates
- * Different category navigation menus
- * Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example MTML for one of these links as displayed on Site A is:

```
k rel="alternate" href="https://www.siteB.com/en_US/womens-new-arrivals"
hreflang="en_US" />
```

Which solution should the Architect choose while keeping performance in mind?

Options:

A- Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales In

JSON Format. Use the attribute to display the hreflang link tag.

B- Create a new custom object type Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.

C- Create additional locales in al realms create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.

D- Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.

Answer:

А

Question 2

Question Type: MultipleChoice

The client provided these business requirements:

* The B2C Commerce storefront will integrate with the client's Order Management System (OMS).

* The storefront will provide reel-time order export of successfully pieced orders

The OMS supports both web service export end SFTP batch order export, but the client has expressed concern about the availability of the OMS.

Which two solutions satisfy the requirements and address the OMS reliability concern?

Choose 2 answers

Options:

A- Implement a live export of orders during checkout vie web service, marking the processed order as exported when the AM returns successfully.

B- Implement a batch export of orders to SFTP, excluding exported orders. This runs as a scheduled fc>b with a high-frequency run rate end marks processed orders as exported upon success.

C- implement a batch export of orders via web service, excluding exported orders. This runs as a scheduled Job with an hourly run rate end marks processed orders as exported upon success.

D- Implement a Live export of orders during checkout via SFTP, marking the processed order as exported when it has completed successfully.

Answer:

Α, Β

Question Type: MultipleChoice

An Architect has been approached by the Business with a request to create a custom product finder. The finder would initially be available on only one site, and would eventually be extended to be available on all sites the Business maintains. There is a requirement that these wrings art also available to be used in a Job context for export to other systems.

Each site will have a different category avertable for use by the product finder.

Where should the Architect store the custom settings for use on both the storefront and in a job context?

Options:

- A- Custom Object with a Site Scope
- **B-** Jobs Framework parameters
- C- Category custom attributes
- D- Custom Object with an Organizational Scope

Answer:

Question Type: MultipleChoice

The Client is planning to switch to a new Payment Service Provider (PSP). They have approached an Architect to understand the time and effort to Integrate the new PSP The PSP offers a LINK cartridge compatible with SiteGenesis Pipelines, but the Client's website is build on Controllers.

Which two options should the Architect take into consideration before starting analysis? Choose 2 answers

Options:

A- Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers.

B- Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development

C- Produce a proof of concept converting the most essential pipelines into controllers and integrate the cartridge.

D- Look for a different PSP that supports controllers and would not require conversion efforts.

Answer:	

A, C

Question Type: MultipleChoice

A Retailer has a single storefront site and a Product Management System (PIM). The Pin is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP

how should the Architect configure the import job flows following the best practices?

Options:

A- 1st flow is global to download the files horn SFTP. 2nd flow is global to import the master catalog. 3rd flow Is global to Import the storefront catalog.

B- 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog 3rd flow K global to Import the master catalog.

C- 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow K global to Import the storefront catalog.

D- 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront catalog 3rd flow It global to Import the master catalog.

Answer:

A

Question Type: MultipleChoice

A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form it not using CSRF validation correctly.

```
<form action="${URLUtils.continueURL()}" method="GET">
       <!-- ... the form input elements ... -->
       <input type="hidden"
           name="$(dw.web.CSRFProtection.getTokenName())"
           value="$(dw.web.CSRFProtection.generateToken())"/>
        <input type="submit" value="Apply Promotion Code"/>
</form>
formResult = cartForm.handleAction({
        'addPromoCode': function (formgroup) (
            var CSRFProtection = require('dw/web/CSRFProtection');
           var status;
           var result = (
               cart: cart,
                EnableCheckout: true,
                dontRedirect: true
            3.2
            status = cart.addCoupon(formgroup.couponCode.htmlValue);
            /* ... some error handling code, based on the returned status ... */
            return result;
        ¥.
112
```

Which two options are best practice recommendations for dealing with CSRF validation? Choose 2 answers

Options:

A- Ensure the CSRF protection is validated on form submission.

- B- Only use GET methods over HTTPS.
- C- Automatically renew the CSRF Token if expired.
- **D-** Only use POST methods over HTTPS.

Answer:	
A, D	

Question 7

Question Type: MultipleChoice

A Client has automated builds that deploy the code; however, recent builds started failing with compilation issues, which are not reproducible in developer's environment.

Whet first step needs to be taken to identify and fix the issue?

Options:

- A- Clean up build server work space and run job again.
- **B-** Verify the modules versions used to generate the code.
- C- Verify the generated JavaScript and CSS for the build.
- **D-** Recreate the job in the build server to verify compilation issues.

Answer:

В

Question 8

Question Type: MultipleChoice

During the testing of the login form, QA finds out that the first time the user can log in, but every other login attempt from another computer leads to the homepage and the basket being emptied. Developers tried to debug the issue, but when they add a breakpoint to the login action, it is not hit by the debugger.

What should the Architect recommend developers to check?

Options:

- A- Remove CSRF protection from Login Form Action.
- B- Add remote include for the login page
- C- Add disable cache page in the template ISML <iscache status--off"/>.
- D- Check Login Form and any included templates for includes that enable page caching.

Answer:

В

Question 9

Question Type: MultipleChoice

a client uses an external marketing toot to manage promotions and coupons for its multiple brands. They currently have only one brand on B2C Commerce and they get Import-ready feeds created by this tool on en SFTP location.

The marketing team completes the data preparation by the end of the work day.

How should the Architect handle this import?

Options:

A- Create a Job and define three steps: one step uses ExecuteScriptModule to download the files from SFTP, end two standard steps to Import the promotion end coupons.

B- Create a Job and define three steps: one standard step to download files from sftp end two steps that use Execute Script Module to import the promotion end coupons.

C- Create a job and define three steps: one custom step to download the files from SFTP, and two standard steps to import the promotion and coupons.

D- Create a Job and define three custom steps: download the files from SFTP, import promotions, import coupons
