Question 1

Question Type: MultipleChoice

Business Manager has the configuration:

* Active Log category is "root"

* Log level of WARN

The code below is executing:

```
var log = Logger.getLogger("products");
```

Using this information, what will be written to the log?

Options:

A- log.warn('This is a warn message'); AND log.error('This is an error message');

B- log.error('This is an error message'); AND log.info('This is an info message');

C- log.info('This is a warn message');

Answer:

C

Question 2

Question Type: MultipleChoice

To ensure SFRA best practices and protect against request forgery, the developer introduced CSRF token

generation in the customer address form:

...

...

To implement CSRF protection when the form is submitted, the developer needs to introduce the CSRF

validation using one or both of these methods as applicable:

validateRequest

validateAjaxRequest

Where in the code does the developer need to add this CSRF validation check?

Options:

- A- In the controller function that displays the form
- B- In the middleware chain of the controller post route
- C- In the controller function that handles the submitted form
- D- In the model function that persists the form data

Answer:

B

Question 3

Question Type: MultipleChoice

A merchant has a new requirement to accept American Express credit cards on its Storefront. A credit card payment method already exists.

Which step must a developer take in Business Manager to achieve this?

Options:

- A- In Payment Methods, enable American Express as a credit card type.
- B- Add American Express into the Order settings in Site Preferences.
- C- In Payment Processor, create American Express as a payment type.
- D- Add American Express as a Payment Preference in Site Preferences.

Answer:

A

Question 4

Question Type: MultipleChoice

A developer customized the Cart-Show controller route with a LINK cartridge that adds social media data

a. There is a new requirement to add a datalayer object to the Cart-Show controller route.

How should the developer achieve this to ensure that no code change will be needed if the client decides to remove the LINK cartridge?

Options:

A- Replace the Cart-Show controller route in client cartridge and add datalayer object to the viewData variable.

B- Replace the Cart-Show controller route in client cartridge and add datalayer object to the viewData variable. Ensure that the client cartridge is on the left of the U.HK cartridge in cartridge path.

C- Append Cart-Show controller route in the client cartridge and add datalayer object to the viewData variable.

Answer:

C

Question 5

Question Type: MultipleChoice

A developer is asked to improve the maintainability of a page by reducing its code repetition.

What are two techniques the developer should implement to achieve this?

Choose 2 answers.

Options:

A- Require and render templates with <iscript> tags

B- Use local template includes

C- Implement template decorators paired with replace tags

D- Embed partial files using ISML expressions

Answer:

B, C

Question 6

Question Type: MultipleChoice

A developer wants to configure the following products so that same search results are returned regardless of the search term used. The search term can be bag, purse, pocketbook, and tote. How should the developer configure this?

Options:

- A- Synonyms
- B- Hypernyms
- C- Hyponyms

Answer:

B

Question 7

Question Type: MultipleChoice

A merchant wants to obtain an export file that contains all the products assigned to their Storefront catalog. They do not know how to achieve this easily without manual processing, so asked their developer to help generate this. The merchant's Instance setup is as follows:

They have one Master catalog and one storefront catalog.

Some, but not all, of the products in the Master catalog are assigned to categories within the Storefront catalog.

Which method allows the developer to generate the export for the merchant?

Options:

- A- Using the Catalog Import and Export module, export the Master catalog with a category-assignment search to export specific
- B- Using the Site Import and Export module, export both the Site catalog and the Master catalog in a single archive.
- C- Using the Site Import and Export module, export the Master catalog filtered by the site catalog categories to export specific products.

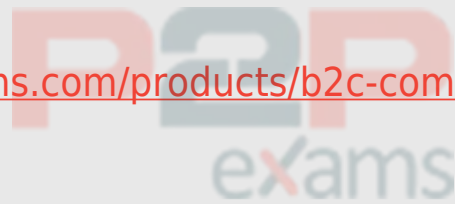

Answer:

C
