Question 1

Question Type: MultipleChoice

A developer needs to check for product inventory in all inventory lists using the Open Commerce API.

An example request URL is:

```
http://refarch.demandware.net/dw/data/v18_3/inventory_lists/ecom-inventory/product_inventory_records/00883408601
```

Which property should the developer check in the OCAPI settings to confirm the appropriate resource is enabled?

Options:

A- Client_id

B- Ecom-inventory

C- Inventory_list

Answer:

B

Question 2

Question Type: MultipleChoice

In order to implement site custom functionality, a developer creates a new cartridge.

Which step should the developer take to ensure their cartridge changes take effect?

Options:

- A- Add the new cartridge to the cartridge path for the business Manager site.
- B- Rebuild the site indexes to capture incremental changes.
- C- Add the new cartridge to the cartridge path for the relevant Storefront site.

Answer:

C

Question 3

Question Type: MultipleChoice

Multiple shoppers report slow performance on the Product Details Page.

Which tool can a developer use to view average response times for the Product-Detail controller route?

Options:

A- Pipeline Profiler

B- Request Logs

C- URL Request Analyzer

Answer:

A

Question 4

Question Type: MultipleChoice

A developer working on a multi country site is asked to store country specific data that drives the creation of a country selector.

Examples of the data stored are:

Pricebook to be used

Image URL for country flag

The data used in staging also applies in production, but only for this site.

Which approach should the developer take to implement these requirements?

Options:

- A- Extend the Locale System Object to contain the custom data for each country.
- B- Create a replicable, site-specific Custom Object with the custom data for each country.
- C- Create site-specific content assets to store the data for each country.

Answer:

B

Question 5

Question Type: MultipleChoice

A client has a requirement to allow users on the Storefront to filter by a newly created attribute.

Which is necessary to achieve this?

Options:

- A- Add a new Search Refinement Definition.
- B- Set the attribute as Searchable.
- C- Change the productseachrefinerbar.iml template

Answer:

B

Question 6

Question Type: MultipleChoice

A merchant wants to obtain an export file that contains all the products assigned to their Storefront catalog. They do not know how to achieve this easily without manual processing, so asked their developer to help Generate this. The merchant's Instance setup is as follows:

They have one Master catalog and one storefront catalog.

Some, but not all, of the products in the Master catalog are assigned to categories within the Storefront catalog.

Which method allows the developer to generate the export for the merchant?

Options:

- A-** Using the Catalog Import and Export module, export the Master catalog with a category-assignment search to export specific
- B-** Using the Site Import and Export module, export both the Site catalog and the Master catalog in a single archive.
- C-** Using the Site Import and Export module, export the Master catalog filtered by the site catalog categories to export specific products.

Answer:

C

Question 7

Question Type: MultipleChoice

The developer has been given the following business requirement:

The shipping method, 'Free Standard Ground Shipping' has an exclusion for products 'with category equals or is child of electronics-televisions.'
