Question 1

Question Type: MultipleChoice

Given a template rendered by a controller with caching and a remote include without caching, which situation applies?

Options:

- A- Both the remote include portion and the rest of the page are cached.
- B- The remote include portion is not cached, but the rest of the page is cached.
- C- The page is cached only for returning customers because of the remote include.
- D- The page is not cached because the remote include introduces an uncached portion.

Answer:

B

Question 2

Question Type: MultipleChoice

A merchant has a requirement to sell a combination of four existing products with a unique product ID.

This collection will be known as 'Our Top Combo', and is based on the merchant's trading information that

shows this combination to be in high demand.

What does the developer need to do next to fulfill this requirement?

Options:

- A- Create a unique product called 'Our Top Combo' and add the four products into the Product Bundles tab.
- B- Create a Content Slot with Content Type = Product and add the four component products into that slot.
- C- Create a Product Set called 'Our Top Combo' and add the products into the set.
- D- Create a recommendation rule associating the four products as a recommendation group.

Answer:

A

Question 3

Question Type: MultipleChoice

A merchant has a new requirement to accept American Express credit cards on its Storefront. A credit card payment method already exists.

Which step must a developer take in Business Manager to achieve this?

Options:

- A- In Payment Methods, enable American Express as a credit card type.
- B- Add American Express into the Order settings in Site Preferences.
- C- In Payment Processor, create American Express as a payment type.
- D- Add American Express as a Payment Preference in Site Preferences.

Answer:

A

Question 4

Question Type: MultipleChoice

A client has a requirement to allow users on the Storefront to filter by a newly created attribute.

Which is necessary to achieve this?

Options:

- A- Add a new Search Refinement Definition.
- B- Set the attribute as Searchable.
- C- Change the productsearchrefinerbar.iml template

Answer:

B

Question 5

Question Type: MultipleChoice

To ensure SFRA best practices and protect against request forgery, the developer introduced CSRF token

generation in the customer address form:

...

...

To implement CSRF protection when the form is submitted, the developer needs to introduce the CSRF

validation using one or both of these methods as applicable:

`validateRequest`

`validateAjaxRequest`

Where in the code does the developer need to add this CSRF validation check?

Options:

- A- In the controller function that displays the form
- B- In the middleware chain of the controller post route
- C- In the controller function that handles the submitted form
- D- In the model function that persists the form data

Answer:

B

Question 6

Question Type: MultipleChoice

When exporting a price book from an external system, which file format or formats should a developer use so it can be imported into a B2C Commerce site?

Options:

- A- JSON only
- B- XML only
- C- CSV only
- D- XML and CSV

Answer:

A

Question 7

Question Type: MultipleChoice

A client has two B2C Commerce sites in the same instance: one for the U.S market, the other for the

European market. The products they make are sold with different safety certificates based-on the world

location.

For example, they sell a smartphone with certificate A in the U.S and certificate B in Europe, a hairdryer with certificate C in the U.S and certificate D in Europe, and more.

How should a developer allow the merchant to display the appropriate certification logo in the produce to

details page, depending on the customer's location?

Options:

- A- Add a Localizable custom attribute to the Certificate system object type.
- B- Ad and Image custom preference to the Sitepreference system object type
- C- Add a Site-specific custom attribute to the Product system object type.
- D- Add a Localizable custom preference to the SitePreference system object type.

Answer:

C
