Question 1

Question Type: MultipleChoice

A developer must write an Apex method that will be called from a lightning component. The method may delete an Account stored in the accountRec variable.

Which method should a developer use to ensure only users that should be able to delete Accounts can successfully perform deletion?

Options:

- A- accountRec., isDeletable()
- B- Account, isDeletable ()
- C- AccountRec, ObjectType, ieDeletable ()
- D- Schena, subjectType, Account, isDeletetable ()

Answer:

D

Question 2

Question Type: MultipleChoice

Which statement describes the execution order when trigger are associated to the same object and event?

Options:

- A- Triggers are executed in the order they are created..
- B- Trigger execution order cannot be guaranteed.
- C- Triggers are executed in the order they are modified
- D- Triggers are executed alphabetically by trigger name.

Answer:

B

Question 3

Question Type: MultipleChoice

A developer created this Apex trigger that calls MyClass,myStartmethod:

```
trigger myTrigger on Contact(before insert)
{
    MyClass.myStaticMethod(trigger.new);
}
```

The developer creates a test method that calls MyClass.myStaticMethod directly, resulting in 81% overall code coverage.

What happens when the developer tries to deploy the ... and two classes to production, assuming no other code exists?

Options:

- A- The deployment fails because the Apex class has no code coverage.
- B- The deployment fails because no assertions were made in the test method.
- C- The deployment passes because the Apex code has the required 75% code coverage.
- D- The deployment passes because both classes and the trigger were included in the deployment.

Answer:

A

Question 4

Question Type: MultipleChoice

When a user edits the postal Code on an Account, a custom Account text field named. Timezone' must be updated based on the values in a PostalCodeToTimezone_c custom object.

Which two automation tools can be used to implement this feature?

Choose 2 answers

Options:

- A- Approval process
- B- Fast field Updates record-triggered flow
- C- Quick actions
- D- Account trigger

Answer:

B, D

Question 5

Question Type: MultipleChoice

A developer has identified a method in an Apex class that performs resource intensive actions in memory by iterating over the result set of a SOQL statement on the account. The method also performs a DML statement to save the changes to the datadase.

Which two techniques should the developer implement as a best practice to ensure transaction control and avoid exceeding governor limits?

Choose 2 answers

Options:

- A-** Use partial DML statements to ensure only valid data is committed.
- B-** Use the System,Limit classto monitor the current CPU governor limit consumption.
- C-** Use the Database,Savepoint method to enforce database integrity.
- D-** Use the Reedonly annotation to bypass the number of rows returned by a SOQL.

Answer:

B, C

Question 6

Question Type: MultipleChoice

A developer needs to create a baseline set of data (Account, Contacts, Products, Assets) for an entire suite allowing them to test independent requirements for various types of Salesforce Cases.

Which approach can efficiently generate the required data for each unit test?

Options:

- A- Use `&TestSteup` with a void method.
- B- Create test data before `Test.startTest` in the unit test.
- C- Create a mock using the Stub APL.
- D- Add `$ IsTest` (see `AllDatattrue`) at the start of the unit test class.

Answer:

A

Question 7

Question Type: MultipleChoice

Which two scenarios require an Apex method to be called imperatively from a Lightning web component?

Choose 2 answer

Options:

- A- Calling a method that makes a web service callout
- B- Calling a method that is not annotated with cacheable=true
- C- Calling a method with the click of a button
- D- Calling a method that is external to the main controller for the Lightning web component

Answer:

B, D

Question 8

Question Type: MultipleChoice

Ursa Major Solar has a custom object, serviceJob-o, with an optional Lookup field to Account called partner-service-Provider_c.

The TotalJobs-o field on Account tracks the total number of serviceJob-o records to which a partner service provider Account is related.

What is the most efficient way to ensure that the Total job_o field kept up to data?

Options:

- A- Change TotalJob_o to a roll-up summary field.
- B- Create a record-triggered flow on ServiceJob_o.
- C- Create an Apex trigger on ServiceJob_o.
- D- Create a schedule-triggered flow on ServiceJob_o.

Answer:

B

Question 9

Question Type: MultipleChoice

Universal Container* decides to use purely declarative development to build out a new Salesforce application.

Which two options can be used to build out the business logic layer for this application?

Choose 2 answer

Options:

- A- Validation Rules
- B- Remote Actions
- C- Record- Triggered flow
- D- Batch Jobs

Answer:

A, C

Question 10

Question Type: MultipleChoice

Universal Container wants Opportunities to no longer be editable when it reaches the Closed/Won stage. Which two strategies can a developer use to accomplish this?

Choose 2 answer

Options:

- A- Use a validation
- B- Use a trigger
- C- Use an after-save flow.
- D- Use the Process Automation settings.

Answer:

A, B

Question 11

Question Type: MultipleChoice

Uniersal Containers (UC) is developing a process for their sales teams that requires all sales reps to go through a set of scripted steps with each new customer they create.

In the first steps of collecting information, UC's ERP system must be checked via as a REST endpoint to see if the customerexists. If the customer exists, the data must be presented to the sales rep in Salesforce.

Which two should a developer implement to satisfy the requirements?

Choose2 answer

Options:

- A- Flow
- B- Future method
- C- Trigger
- D- Invocable method

Answer:

B, D

Question 12

Question Type: MultipleChoice

A company wants to implement a new call center process for handling customer service calls. It requires service reps to ask for the caller's account number before proceeding with the rest of their call script.

Following best practices, what is the optimal approach to satisfy this requirement?

Options:

A- Flow Builder

B- Approvals

C- Apex trigger

D- Einstein Next Best Action

Answer:

A
