Question 1

Question Type: MultipleChoice

What is Scrum of Scrums?

Options:

- A- Inspection of code and configuration prior to sprint demo
- B- Integration meeting among the various Scrum teams
- C- Scrum team led by very experienced Scrum master
- D- Alternative to regular Scrum process for a very large team

Answer:

B

Explanation:

The Scrum of Scrums is a cross-team coordination meeting, allowing teams working on interconnected deliverables to synchronize efforts, address dependencies, and manage impediments. This approach is beneficial for large projects requiring multiple Scrum teams.

Question 2

Question Type: MultipleChoice

How do you set up Scrum teams? Note: There are 2 correct answers to this question.

Options:

- A- As a cross-functional team covering multiple functions, like configuration, data loads, and testing.
- B- By type of work, like configuration Scrum, documentation Scrum, and testing Scrum.
- C- Based on group size, but a minimum of 12 people.
- D- Based on end-to-end processes like order-to-cash.

Answer:

A, D

Explanation:

Scrum teams are often set up as cross-functional teams with a mix of expertise (e.g., configuration, data loads) or based on end-to-end processes (like order-to-cash). These setups allow teams to work collaboratively across different aspects of the project while focusing on functional flows.

Question 3

Question Type: MultipleChoice

In which workshop do you validate SAP standard functionality and collect delta requirements?

Options:

- A- Solution design
- B- Fit-to-standard
- C- Fit-to-gap
- D- Solution assessment

Answer:

B

Explanation:

The Fit-to-Standard workshop is where SAP standard functionality is validated against business requirements, and any additional needs (delta requirements) are identified. This approach ensures alignment with SAP Best Practices while addressing specific business needs.

Question 4

Question Type: MultipleChoice

What is the primary purpose of the SAP Activate methodology?

Options:

- A- To provide end-to-end application lifecycle management
- B- To enable access to the SAP ecosystem
- C- To expedite all deployments of SAP products
- D- To manage project documentation

Answer:

A

Explanation:

The SAP Activate methodology provides end-to-end lifecycle management for SAP applications, offering a structured approach that includes phases, workstreams, and best practices for successful SAP solution deployments.

Question 5

Question Type: MultipleChoice

Which of the following tools facilitate secure communication between SAP cloud solutions and protected on-premise networks that CANNOT be accessed directly from the Internet?

Options:

- A- Identity Authentication service
- B- SAP Build Cade
- C- SAP BTP Connectivity service
- D- Cloud Integration Automation service

Answer:

C

Explanation:

The SAP BTP Connectivity service facilitates secure connections between SAP cloud solutions and on-premise networks that are isolated from direct internet access, ensuring data security and compliance.

Question 6

Question Type: MultipleChoice

Who determines the tasks that are required to complete the committed backlog items in a Sprint?

Options:

- A- Project manager
- B- Scrum master
- C- Scrum team
- D- Product owner

Answer:

C

Explanation:

In Agile methodology, the Scrum team self-organizes to determine the specific tasks needed to complete backlog items. This autonomy encourages accountability and collaboration among team members to achieve sprint goals.

Question 7

Question Type: MultipleChoice

Which of the following is a key characteristic of the Agile project approach?

Options:

- A- Higher business involvement in the early phases
- B- Frequent and detailed release scheduling
- C- Iterative build with frequent inspections
- D- Frequent quality gates in each sprint

Answer:

C

Explanation:

A core feature of Agile is its iterative nature, with regular inspections throughout each sprint. This approach ensures adaptability and early issue resolution, promoting continuous alignment with business requirements.
