Question 1

Which services can trigger a consolidation process (integration scenario)? Note: There are 3 correct answers to this question.

Options:

A- Open match groups

B- Data from source systems

C- Replication of activated data

D- Validation

E- Best record calculation

Answer:

A, D, E

Question 2

You want to define time limits for change request processing according to duration and status based on the customerls KPIs. Which of the following actions will you perform? Note: There are3 correct answers to this question.

Options:

A- Configure process insight in SAP HANA-based analytics.

B- Set up an edition to control the maximum runtime of a changerequest.

C- Define thresholds with the generic time management BAdl.

D- Configure the service level agreement (SLA) for the changerequest types.

E- Define change request priorities, reasons, and rejection reasons.

Answer:

A, D, E

Question 3

Question Type: **MultipleChoice**

You want to reduce the impact on system performance after a mass data load by avoiding the non-intentional replication of large amounts of dat

a. Which replication modes are applicable?Note: There are 2 correct answers to this question.

Options:

A- SOA-based replication

B- Filters and change pointers

C- Limit changes using time interval

D- DRFLOG transaction

Answer:

A, C

Question 4

Question Type: **MultipleChoice**

What reference data should be part of the customizing sync with the target system prior to material master governance in SAP Master Data Governance? Note: There are 3 correct answers to this question.

Options:

A- Purchasing groups

B- Unit of measure

C- Purchase orders

D- Plant codes

E- Characteristic valuation

Answer:

A, B, D

Question 5

Question Type: **MultipleChoice**

Which of the following capabilities are supported out of the box by SAP Master Data Governance (MDG) using the data replication framework (DRF)? Note: There are 2 correct answers to this question.

Options:

A- Cross-system monitoring is possible using System Landscape Directory (SLD).

B- Key mapping of master data and value mapping of organizational and or reference data is supported.

C- Replication to non-SAP systems is possible using the Enrichment Framework.

D- Various communication channels, including ALE/IDoc, RFC, Web services, and files are available.

Answer:

C, D

Question 6

Question Type: **MultipleChoice**

Which steps are integrated with Business Rules Framework plus(BRFplus) as a part of the

data consolidation process flow?

Note: There are 3 correct answers to this question.

A- Validate

B- Standardize

C- Data Load

D- Calculate Best Record

E- Match

Answer:

A, B, D

Question 7

Question Type: MultipleChoice

You want to define key mapping between object instances basedon the Unified Key Mapping Service (UKMS)? Which activitiescan you perform? Note: There are 2 correct answers to this question.

Options:

A- No activities are required because key mappings can be usedinstantly, without doing any customizing.

B- No activities are required because key mappings are adjustedautomatically during client copy.

C- Configure the workflow templates for new or updated objects.

D- Review and enhance the basis mapping rules in customizing.

Answer:

A, D

Question 8

Your customer has a custom entity in the business partner data model. Some of the attributes from the entity are to be excluded from the governance scope. What activity would you perform?

Options:

A- Define governance status for the attributes in the governance scope.

B- Define a new change request step type and specify which fields should be governed.

C- Define the attributes on a new user interface building block to behidden manually by the user.

**D-** Define validations to exclude the attributes from change request processing.

Answer:

A

Question 9

Question Type: **MultipleChoice**

Which of the following are basic principles of the SAP Master Data Governance solution? Note: There are 3 correct answers to this question.

Options:

A- Readiness for change

B- Central governance

C- Consolidation

D- Organization

E- Data quality management

A, B, E

Question 10

Question Type: MultipleChoice

Which technology/tool can you use to load data directly into thestaging area? Choose the correct answer.

Options:

A- It is not possible to load data directly into the staging area

B- ALE or SAP Data Services using IDocs

C- Legacy System Migration Workbench (LSMW) using XLSX workbook

D- Data Import Framework (DIF) using XML file format

Answer:

D
