Question 7

Question Type: MultipleChoice

You need to enhance the data model with a custom field which should be maintained by the processor via user interface.

Instead of using the SAP Fiori applications, classic Web Dynpro applications are used. The custom field does NOT have to be replicated to the target system(s).

Which activities must you perform?

There are 2 correct answers to this question.

Options:

- A) Implement the Data Model Enhancement BAdi and map the new field to the corresponding entity.
- B) Adjust the workflow setup for the corresponding process(es) to make the field maintainable in the process.
- C) Customize the UI Configuration of the corresponding entity with the custom field in the Floorplan Manager (FPM).
- D) Enhance the corresponding entity with the custom field in the SAP Master Data Governance data model, activate the data model and generate the data-model specific structures.

Answer:

C, D

Question 8

Question Type: MultipleChoice

How is the material in SAP Master Data Governance (MDG) for material activated in a typical MDG setup to the underlying client of the same system?

Please choose the correct answer.

Options:

- A) Automatically due to the flex mode via replication using IDocs or Web services
- B) Automatically due to the reuse mode via replication using IDocs or Web services
- C) Automatically due to the flex mode via the pre-delivered standard handler class
- D) Automatically due to the reuse mode via the pre-delivered standard handler class

Answer:

D

Question 9

Question Type: MultipleChoice

How does SAP Master Data Governance (MDG) ensure that the same object on an entity levels NOT processed in different change requests?

Please choose the correct answer.

Options:

- A) The object is locked when it is assigned to a change request until the change request step defined in SAP MDG customizing as

'unlocking step' is executed.

- B)** The object is locked when it is assigned to a change request until the current change request processor forwards the change request to the next processor in the governance process.
- C)** The object is locked when it is assigned to a change request until the corresponding change request is withdrawn or finally approved.
- D)** The object is locked when it is assigned to a change request until the object is successfully saved and validated.

Answer:

B
