Question 1

Question Type: MultipleChoice

Which features are available when working with the Manage Documents app?Note: There are 2 correct answers to this question.

Options:

- A-** A secure storage area can be selected manually.
- B-** An object link to every SAP Object can be defined.
- C-** All information is displayed on only one page.
- D-** A secure storage area is selected automatically.

Answer:

C, D

Question 2

Question Type: MultipleChoice

What objects can be changed with a change number?

Options:

- A-** Bills of Material
- B-** Cost Centers
- C-** Work Centers
- D-** Task Lists

Answer:

A, D

Question 3

Question Type: MultipleChoice

In a single-level configuration, you want to use a constraint so that if characteristic C1 has the value V1, then characteristic C2 is assigned the value V2.C1 and C2 are assigned to class (300)T_FCL00.What would be a correct complete constraint?

Options:

- A- RESTRICTION: \$self.C2 = 'V2' if \$self.C1 = 'V1'
- B- RESTRICTION: (300)T_FCL00.C2 = 'V2' if (300)T_FCL00.C1 = 'V1'
- C- RESTRICTION: ?C2 = 'V2' if ?C1 = 'V1'
- D- RESTRICTION: ?T_FCL00.C2 = 'V2' if ?T_FCL00.C1 = 'V1'

Answer:

B

Question 4

Question Type: MultipleChoice

You create a new characteristic with numeric values and you only set a single value assignment. You add one interval inside value tab. What does it mean for classification?

Options:

- A- The user can set values which don't belong to the interval.

- B-** The user can select an interval inside classification.
- C-** The user can select one value of the interval inside classification.
- D-** The user can select several values out of the interval inside classification.

Answer:

C

Question 5

Question Type: MultipleChoice

There are item categories that are only allowed in configurable BOMs. What do you have to keep in mind when working with configurable routings? Note: There are 3 correct answers to this question.

Options:

- A-** Equipment as production resources/tools may only be used in configurable routings.
- B-** All types of operation can be used in non-configurable and configurable routings.
- C-** All sequence categories can be used in non-configurable and configurable routings.

- D-** All production resources/tools categories can be used in non-configurable and configurable routings.
- E-** Alternative sequences may only be used in configurable routings.

Answer:

A, B, E

Question 6

Question Type: MultipleChoice

You create a new characteristic with numeric values and you only set a single value assignment. You add one interval inside value tab. What does it mean for classification?

Options:

- A-** The user can set values which don't belong to the interval.
- B-** The user can select an interval inside classification.
- C-** The user can select one value of the interval inside classification.
- D-** The user can select several values out of the interval inside classification.

Answer:

C

Question 7

Question Type: MultipleChoice

What objects can be changed with a change number?

Options:

A- Bills of Material

B- Cost Centers

C- Work Centers

D- Task Lists

Answer:

A, D

Question 8

Question Type: MultipleChoice

Which features are available when working with the Manage Documents app?Note: There are 2 correct answers to this question.

Options:

- A- A secure storage area can be selected manually.
- B- An object link to every SAP Object can be defined.
- C- All information is displayed on only one page.
- D- A secure storage area is selected automatically.

Answer:

C, D

Question 9

Question Type: MultipleChoice

There are item categories that are only allowed in configurable BOMs. What do you have to keep in mind when working with configurable routings? Note: There are 3 correct answers to this question.

Options:

- A-** Equipment as production resources/tools may only be used in configurable routings.
- B-** All types of operation can be used in non-configurable and configurable routings.
- C-** All sequence categories can be used in non-configurable and configurable routings.
- D-** All production resources/tools categories can be used in non-configurable and configurable routings.
- E-** Alternative sequences may only be used in configurable routings.

Answer:

A, B, E

Question 10

Question Type: MultipleChoice

In a single-level configuration, you want to use a constraint so that if characteristic C1 has the value V1, then characteristic C2 is assigned the value V2.C1 and C2 are assigned to class (300)T_FCL00.What would be a correct complete constraint?

Options:

- A-** RESTRICTION: \$self.C2 = 'V2' if \$self.C1 = 'V1'
- B-** RESTRICTION: (300)T_FCL00.C2 = 'V2' if (300)T_FCL00.C1 = 'V1'
- C-** RESTRICTION: ?C2 = 'V2' if ?C1 = 'V1'
- D-** RESTRICTION: ?T_FCL00.C2 = 'V2' if ?T_FCL00.C1 = 'V1'

Answer:

B
