**Answer:**

---

A, D

## Question 7

---

**Question Type:** MultipleChoice

---

When you troubleshoot a catalog synchronization issue, which files do you check first? Note: There are 3 correct answers to this question.

**Options:**

---

- A- Sync Media dump files
- B- Database dump files
- C- localextensions.xml file
- D- JDBC log files
- E- local.properties file

**Answer:**

---

A, B, E

## Question 8

---

**Question Type:** MultipleChoice

---

What must you do when you provide a workaround for a code glitch in an existing service, for example, ProductService? Note: There are 3 correct answers to this question.

### Options:

---

- A-** Modify the existing bean definition with the new service.
- B-** Add a new bean definition with a new ID for the new service.
- C-** Implement a new custom service by extending the existing service.
- D-** Override the alias of the original bean definition.
- E-** Replace all injections with a new ID for the new service.

### Answer:

---

A, B, C

## Question 9

---

**Question Type:** MultipleChoice

---

A customer reports an incident where the SAP Commerce system crashes in production. The customer provides the following log: What would you advise the customer to do to avoid this happening again?

### Options:

---

- A-** Configure the auto reconnect property in the JDBC properties to reconnect to the database automatically.
- B-** Modify the FlexibleSearch query that fetches catalogs to fix the syntax errors.
- C-** Increase the number of connections in the pool if the current number is NOT sufficient.
- D-** Fix the missing links between related items in the catalog.

### Answer:

---

B

## Question 10

---

**Question Type:** MultipleChoice

---
