**Answer:**

---

B, C

## Question 5

---

**Question Type:** MultipleChoice

---

Your solution has been live for a significant period of time. Now you need to update project data

across multiple environments, but this update should only be executed once. What is the recommended approach for updating the project data?

**Options:**

---

A- Create a class that extends AbstractPatchesSystemSetup and configure any data patches, which can run an import of your ImpEx files during an update.

**B-** Extract a SQL script of all the changes in a single environment, which a DBA can then run directly against the database for all remaining environments.

**C-** Create a class that extends AbstractSystemSetup and use the @SystemSetup annotation with TYPE.PROJECT, which can run an import of your ImpEx files during an update.

**D-** With each deployment, manually import the ImpEx files via the hybris Admin Console or via the ant importimpex target.

**Answer:**

---

C

## Question 6

---

**Question Type: MultipleChoice**

---

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

The miniature car replicas your company sells on its site are now available in a choice of colors, each at a different price point. You wish your product page to allow your customers to select the color before adding the replica to the cart. To complicate things, your boss won't let you restart your production servers to add this functionality. What entities would you have to create to achieve this?

### Options:

---

- A-** A ConfigurationCategory, an AbstractConfiguratorSetting for color, a ConfiguratorType, and an OrderEntryProductInfo for each color a given replica is available in.
- B-** A VariantCategory for color, a VariantValueCategory for each color, and a GenericVariantProduct for each color a given replica is available in.
- C-** A ClassificationCategory, a ClassificationAttribute for color, a ClassificationAttributeUnit, a ClassificationAttributeValue for each color a given replica is available in, and a ClassAttributeAssignmentModel instance to tie them together.
- D-** A ComposedType, that extends the VariantProduct type to add a color attribute, and an instance of this type for each color a given replica is available in.

### Answer:

---

C

## Question 9

---

### Question Type: MultipleChoice

---
