# Question 1

---

**Question Type:** MultipleChoice

---

Which statement regarding propagation is FALSE?

## Options:

---

- A-** Automatic propagation can be set globally, so every new job will automatically propagate.
- B-** Propagation can only occur in the direction of the job flow diagram (from beginning to end). Propagation from the end to the beginning is not available.
- C-** Automatic propagation that is set globally can be overridden and disabled within a job.
- D-** Automatic propagation that is set globally or at the job level can be overridden and disabled for a selected transformation.

## Answer:

---

B

# Question 2

---

**Question Type:** MultipleChoice

---

Within SAS Data Integration Studio, automatic mappings are disabled for a job. A transformation has defined source columns and defined target columns. One of the source columns, named COLI, is character with a length of 50. One of the target columns, named COLI, is also character but of length 25. What will happen if the COLI columns are mapped?

**Options:**

---

- A-** The COLI columns are successfully mapped, one-to-one, with no warnings.
- B-** The COLI columns are not mapped because the lengths are different.
- C-** The COLI columns are mapped but an expression is defined for the target COLI that uses a generic specification of the LENGTH function.
- D-** The COLI columns are successfully mapped, one-to-one, but a warning occurs.

**Answer:**

---

D

## Question 3

---

**Question Type:** MultipleChoice

---

The Platform Process Manager server is part of the Platform Suite for SAS. Which statement is FALSE regarding the Platform Process Manager server?

**Options:**

---

- A-** The server enables you to schedule jobs using a variety of recurrence criteria and dependencies on other jobs, time events, or file events.
- B-** The server enables you to schedule jobs using a variety of recurrence criteria but does NOT allow you to specify any type of dependencies.
- C-** The Flow Manager application (part of the Platform Suite for SAS) can be used to manage already scheduled jobs.
- D-** Metadata for the Platform Process Manager server must be defined and must include the network address or host name of a machine as well as the port number for the server.

**Answer:**

---

B

## Question 4

---

**Question Type:** MultipleChoice

---

Within SAS Data Integration Studio, which type of expression can be created using the Expression Builder window in the Where tab of SAS Extract transformation? 1) a SAS expression 2) an SQL expression 3) an XML expression 4) a constant

**Options:**

---

- A- land2only
- B- land3only
- C- 1,2and4only
- D- 1,2,3,and4

**Answer:**

---

C

## Question 5

---

**Question Type: MultipleChoice**

---

Within SAS Data Integration Studio's SQL Join transformation, the Validate Expression button is located in:

**Options:**

---

- A- a Where clause definition
- B- an Expression Builder window
- C- afield Expression definition
- D- a Subquery definition

**Answer:**

---

B

## Question 6

---

**Question Type: MultipleChoice**

---

The profile reports generated in dfPower Profile jobs are viewed:

**Options:**

---

- A- in dfPower Profile (Viewer)

**B-** in the Reports tab of dfPower Profile (Configurator)

**C-** in any HTML viewer

**D-** in any text viewer

**Answer:**

---

A
