Question 1

Question Type: MultipleChoice

As a Developer, why should you assign security to roles instead of users when setting up security on a site?

Options:

- A-** Security can be managed more efficiently as the rights and permissions apply to a group of users.
- B-** Role-based security allows multiple users to have the same username but different passwords.
- C-** Assigning security to roles enables individual rights and permissions to be configured by users.
- D-** Individual users with a role can set their own item security permissions.

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following information is available within Workbox?

Options:

- A- Number of editable data source items in all of Sitecore
- B- Information about an item's originating template
- C- Number of active campaigns divided by marketing team
- D- Available workflow commands divided by associated workflow

Answer:

D

Question 3

Question Type: MultipleChoice

A team member incorrectly entered their password several times when attempting to log in to Sitecore and is now locked out of their account. What can you do to unlock this user?

Options:

- A- Go to the User Manager, select the user, and click Edit to update user settings.
- B- Go to the Security Editor, select the user, and update their access rights to Sitecore.
- C- Go to the User Manager, select the user, and click Change password to unlock the user's account by resetting their password.
- D- Go to the User Manager, select the user, and click Unlock in the navigation ribbon.

Answer:

D

Question 4

Question Type: MultipleChoice

If the Sitecore Content Management instance can be accessed by multiple host names, what would you do to enable users for each site to be able to log in to the Sitecore shell?

Options:

- A- Patch the web.config for the Content Management instance with the required permission groups.

- B-** Update the role for each user group to include the appropriate site permissions.
- C-** Remove all specific host names from the Identity Server configuration settings file and replace them with wild-card options.
- D-** Add AllowedCorsOriginsGroup for each site to the Identity Server configuration.

Answer:

D

Question 5

Question Type: MultipleChoice

Which statement characterizes the Sitecore Extranet security domain?

Options:

- A-** It provides default access to the Sitecore identity server for users to log in to the appropriate environment areas.
- B-** It is an internal security domain for users that can access the Sitecore client tools and editing functionality.
- C-** It is the domain that contains user accounts as well as customized roles for managing read access to the website content.
- D-** It provides customized roles for controlling access to third-party environments such as a CRM or payment portal.

Answer:

C

Question 6

Question Type: MultipleChoice

Sitecore utilizes several databases with various purposes. What data is stored in the Master database?

Options:

- A- Configuration information about the Sitecore user interfaces
- B- Only the latest versions of items that have been published
- C- .NET membership and security authorization tables
- D- All versions of all the content, including unpublished content

Answer:

D
