Question 1

Question Type: MultipleChoice

What is the purpose of developing field editor buttons for Experience Editor?

Options:

- A- To allow Content Authors to edit image fields within Experience Editor.
- B- To provide additional field-editing functionality for complex fields through a pop-up window.
- C- To give Content Authors the ability to change the field type as they work on content.
- D- To open the rich text editor for fields of the rich text type in Experience Editor.

Answer:

B

Question 2

Question Type: MultipleChoice

If the Sitecore Content Management instance can be accessed by multiple host names, what would you do to enable users for each site to be able to log in to the Sitecore shell?

Options:

- A- Patch the web.config for the Content Management instance with the required permission groups.
- B- Update the role for each user group to include the appropriate site permissions.
- C- Remove all specific host names from the Identity Server configuration settings file and replace them with wild-card options.
- D- Add AllowedCorsOriginsGroup for each site to the Identity Server configuration.

Answer:

D

Question 3

What are the three elements that make up a workflow? (Choose three.)

Options:

- A- Actions
- B- Submissions
- C- Security
- D- Permissions
- E- States
- F- Commands
- G- Approvals

Answer:

A, E, F

Question 4

Question Type: MultipleChoice

With Sitecore MVC, how do you ensure a field cannot be edited when you use the field helper to render content?

Options:

- A- Use the non-editable equivalent field type.
- B- Use the DisableWebEdit option.
- C- Set the editable parameter to 'false'.
- D- Mark the field as non-editable in the field definition item.

Answer:

B

Question 5

Question Type: MultipleChoice

When creating data templates, you have the option to add Field sections (at least one is

required). What is the purpose of Field sections?

Options:

- A- Field sections are used for grouping related fields with templates and the resulting items.
- B- Field sections enable Content Authors to add content to various fields.
- C- Field sections make template items easier to recognize in Sitecore Rocks.
- D- Field sections provide a hierarchical way of navigating fields in the code.

Answer:

A

Question 6

Question Type: MultipleChoice

When creating your containerized Sitecore environment with Docker, for the ease of launching the containers, which two files are recommended? (Choose two.)

Options:

- A- clean.ps1
- B- docker-compose.yml
- C- compose.yml
- D- .env
- E- docker.exe

Answer:

B, D

Question 7

Question Type: MultipleChoice

When developing using Sitecore headless SDKs, What is the relationship between the rendering host and the Sitecore Content Delivery role?

Options:

- A- The Content Delivery role hosts the headless services that the rendering host uses to retrieve Sitecore content and layout.
- B- The Content Delivery role has absolutely no relation to the rendering host as both are separate features for content management and delivery.
- C- The rendering host is a plugin feature that is loaded into the Content Delivery role to enhance the response speed of page requests.
- D- The rendering host is integrated into the Content Delivery role to make a highly-coupled system for retrieving and displaying content data.

Answer:

B

exams

Answer:

C

Question 9

Question Type: MultipleChoice

Which statement characterizes the Sitecore Extranet security domain?

Options:

- A- It provides default access to the Sitecore identity server for users to log in to the appropriate environment areas.
- B- It is an internal security domain for users that can access the Sitecore client tools and editing functionality.
- C- It is the domain that contains user accounts as well as customized roles for managing read access to the website content.
- D- It provides customized roles for controlling access to third-party environments such as a CRM or payment portal.

Answer:

C

Question 10

Question Type: MultipleChoice

As a Developer, why should you assign security to roles instead of users when setting up security on a site?

Options:

- A- Security can be managed more efficiently as the rights and permissions apply to a group of users.
- B- Role-based security allows multiple users to have the same username but different passwords.
- C- Assigning security to roles enables individual rights and permissions to be configured by users.
- D- Individual users with a role can set their own item security permissions.

Answer:

A

Question 11

Question Type: MultipleChoice

A company you develop for wants to temporarily change the design for their main page for a company anniversary celebration. Because this will be a specific version of the main page that is published for a specific period, which Sitecore feature enables you to accomplish this change

while easily allowing you to revert to the original design?

Options:

- A- Final layouts
- B- Shared layouts
- C- Restricted layouts
- D- Versioned layouts

Answer:

D
