Question 1

Question Type: MultipleChoice

Which activity cannot be used as a Condition in a Retry Scope activity?

Options:

- A- Check True
- B- Is Match
- C- Path Exists
- D- Exists In Collection

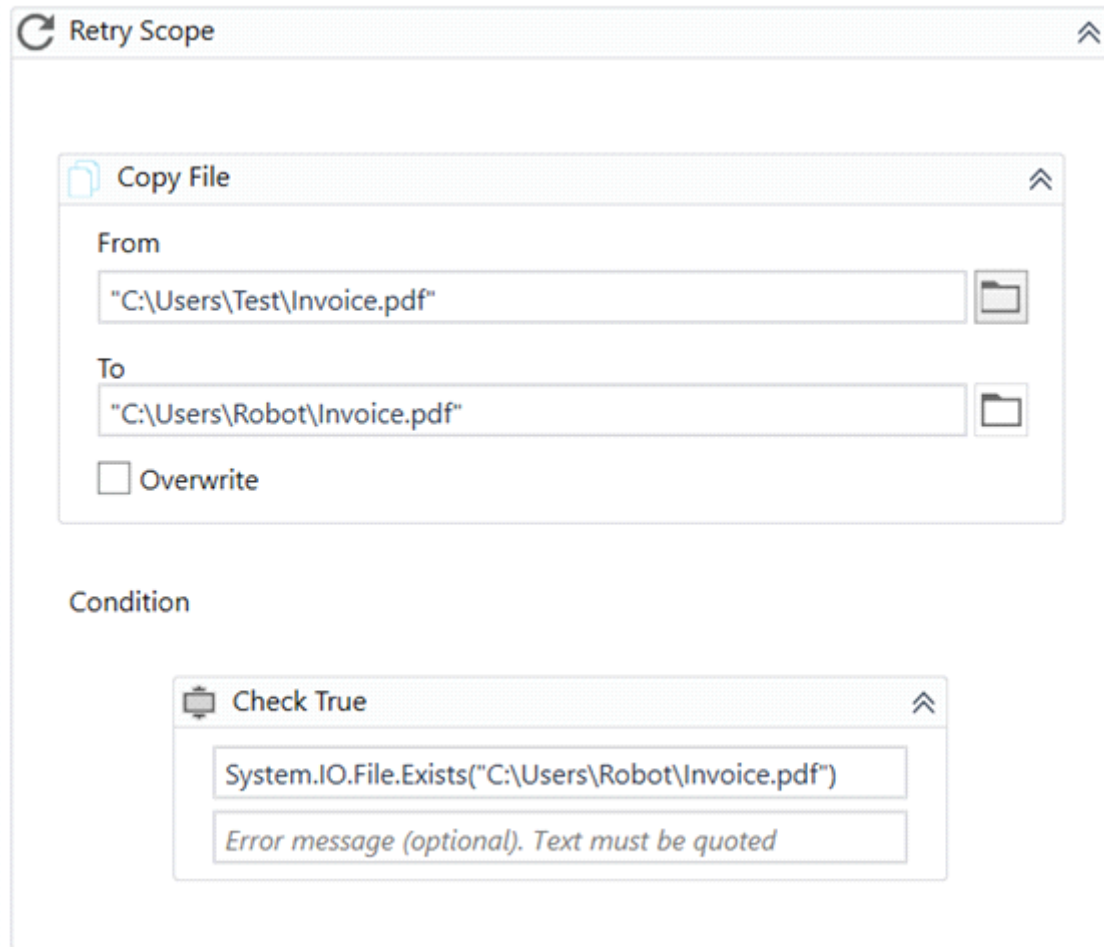

Answer:

C

Explanation:

Retry Scope condition can be one of the activities that return a boolean. Even though the Path Exists activity also returns a Boolean value, it cannot be used in Retry Scope, it is an exception.

Instead of using Path Exists activity, you can use a Check True activity and as a condition place `System.IO.File.Exists(filepath)`.

Exam Topic: Identify and describe the use of the error handling activities such as Try Catch, Throw, Rethrow, Retry Scope, and Global Exception Handler.

Question 2

Question Type: MultipleChoice

A developer wants to automate a process in an internal ERP system. The robot needs to log in to the system using login and password. What is the correct approach to using credentials in UiPath?

Options:

- A- The developer should store login and password in the Config file.
- B- The credentials should be stored in Orchestrator and retrieved using Get Credential activity.
- C- The credentials should be stored in Orchestrator and retrieved using Get Asset activity.
- D- The developer should write login and password directly in Type Into activity.

Answer:

B

Explanation:

Gets a specified Orchestrator credential by using a provided AssetName, and returns a username and a secure password.

UiPathDocumentation

Exam Topic:Describe how to work with Orchestrator queues and assets
