Options:

A- Converts the result of extraction to a dataset or to a customized format.

B- Allows a human to validate and correct the extracted data.

C- Classifies the document as one of the predefined document types.

D- Extracts the text out of the image document using OCR (Optical Character Recognition).

Answer:

A

Question 2

Question Type: MultipleChoice

How can you build custom models supported by AI Center?

Options:

A- Using the Al Center IDE (Integrated Development Environment).

B- Using the Al Center model builder.

C- Using a Python IDE (Integrated Development Environment) or an AutoML platform.

D- Using a C/C++ IDE (Integrated Development Environment), then upload the code to Al Center IDE.

Answer:

C

Question 3

Question Type: MultipleChoice

What is the recommended split of documents for training and evaluation, considering a total of 15 documents per vendor?

Options:

A- 7 documents for training the model, and 8 for evaluating the model.

B- 8 documents for training the model, and 7 for evaluating the model.

C- 10 documents for training the model, and 5 for evaluating the model.

D- 12 documents for training the model, and 3 for evaluating the model.

Answer:

C

Question 4

Question Type: MultipleChoice

How is the Taxonomy component used in the Document Understanding Template?

Options:

A- To define the document types and the pieces of information targeted for data extraction (fields) for each document type.

B- To apply rigor in the taxonomy of data, ensuring any newly discovered object fits into one and only one category or object.

C- To organize knowledge by using a controlled vocabulary to make it easier to find related information.

D- To apply relationship schemas other than parent-child hierarchies, such as network structures on the processed data.

Answer:

A

Question 5

Question Type: MultipleChoice

How can the code be tested in a development or testing environment in the context of the Document Understanding Process?

Options:

A- Use them as a template to create other tests.

B- Simply run the existing tests

C- Based on the use case developed, create test data to test existing and new tests.

D- Based on the use case developed, create test data to test existing tests.

Answer:

C

Question 6

Question Type: MultipleChoice

What do entity predictions refer to within UiPath Communications Mining?

Options:

A- The understanding of the parent-label relationship when assigning label predictions.

B- The difference between label suggestions and label predictions in a training process.

C- The identification of a specific span of text as a value for a particular entity type.

D- The model's confidence that a specific concept exists within a communication.

Answer:

C

Question 7

Question Type: MultipleChoice

What information does the comparison between two cohorts display on the Comparison page in UiPath Communications Mining?

Options:

A- Total verbatim count and proportion for each label.

B- Entity count for each metadata.

C- Verbatim content for each label.

D- Differences in verbatim length between Group A and Group B.

Answer:

A
