Question 1

Question Type: MultipleChoice

A cloud provider wants to adopt VMware Cloud Foundation for management and resource clusters and is planning on having separate management and user workload domains.

Which architecture achieves this goal?

Options:

A- Multi-instance Management

B- Standard

C- Stretched

D- Consolidated

Answer:

B

Question 2

Question Type: MultipleChoice

In which two ways can a vApp be built using the VMware Cloud Director tenant portal? (Choose two.)

Options:

- A- By importing a vApp using a VMDK
- B- By creating a vApp from a vApp template
- C- By creating a vApp from an ISO image
- D- By creating a vApp from catalog
- E- By importing a vApp from vCenter Server as a vApp

Answer:

B, D

Question 3

Question Type: MultipleChoice

An administrator is planning a new VMware Cloud Director deployment and is concerned about secure communications between the clients and servers.

Which two recommended steps would ensure secure communications between the clients and servers? (Choose two.)

Options:

- A-** VMware Cloud Director automatically creates self-signed certificates.
- B-** Create a single certificate for each member of the server group, and import the certificates into the host keystores.
- C-** Create two certificates for the server group, and import the certificates into each cell's keystore.
- D-** Create a single certificate and upload it through the Service Provider Portal to all members of the server group.
- E-** Create or use an existing wildcard certificate, and import it into each cell's keystore.

Answer:

C, E

Question 4

Question Type: MultipleChoice

An individual is logged into the VMware Cloud Director tenant portal as organization administrator and would like to create a direct organization virtual data center network. The individual, however, receives a message that insufficient rights are held.

Which role is needed to complete this task?

Options:

- A- vApp author
- B- System administrator
- C- Catalog author
- D- Tenant administrator

Answer:

D

Question 5

Question Type: MultipleChoice

A system administrator is cleaning up old custom roles to align with management via rights bundles and sees a role that is not a default role in VMware Cloud Director.

Which role should be deleted by the system administrator?

Options:

A- vApp User

B- Catalog Author

C- Organization Administrator

D- vApp Manager

Answer:

D

Explanation:

Organization Administrator exist, vApp Manager doesn't exist

Question 6

Question Type: MultipleChoice

Which plugin, in addition to the VMware vRealize Orchestrator Plugin for Cloud Director, can be used to enable the system administrator to automate tasks in VMware Cloud Director through vRealize Orchestrator?

Options:

- A- SOAP Plugin
- B- VAPI Plugin
- C- REST Plugin
- D- SNMP Plugin

Answer:

C

Explanation:

<https://blogs.vmware.com/cloudprovider/2018/07/extend-and-automate-vcloud-director-using-vrealize-orchestrator.html>

Question 7

Question Type: MultipleChoice

Which allocation model can only be non-elastic?

Options:

- A- Reservation Pool
- B- Allocation Pool
- C- Pay-As-You-Go
- D- Flex

Answer:

A

Explanation:

Other limitations of this model are that it is not elastic and organization users might set nonoptimal shares, rates, and limits on virtual machines, leading to underuse of resources. <https://docs.vmware.com/en/VMware-Cloud-Director/10.2/VMware-Cloud-Director-Service-Provider-Admin-Portal-Guide/GUID-98DABDAD-3447-475E-AADC-BE09F6046E34.html>

Question 8

Question Type: MultipleChoice

Which two Linux distributions are supported as the base operating system for a VMware Cloud Director installation? (Choose two.)

Options:

- A- Red Hat Enterprise Linux
- B- Ubuntu
- C- Debian Linux
- D- Amazon Linux
- E- CentOS

Answer:

A, E

Question 9

Question Type: MultipleChoice

What happens to a VM within an oVDC which uses the Pay-As-You-Go allocation model if there are insufficient resources?

Options:

- A- It gets corrupted.
- B- It powers on as the resources are assigned at the organization VDC level.
- C- It fails to power on.
- D- It takes advantage of the resources of idle virtual machines.

Answer:

C

Question 10

Question Type: MultipleChoice

An administrator has vCenter Server clusters that will be providing resources to VMware Cloud Director.

Which setting is a requirement?

Options:

A- Fully Automated DRS

B- vCenter HA

C- Storage DRS

D- vSphere HA

Answer:

A

Question 11

Question Type: MultipleChoice

On which type of network in VMware Cloud Director can fence mode be enabled?

Options:

- A- Isolated vApp Network
- B- Direct vApp Network
- C- External Network
- D- Routed vApp Network

Answer:

B
