- B- all users who have an account in Azure Active Directory (Azure AD) that is linked to an Azure subscription only

C- anyone

D- billing readers for an Azure subscription only

Answer:

C

Question 6

Question Type: MultipleChoice

Your company plans to migrate all its data and resources to Azure.

The company's migration plan states that only Platform as a Service (PaaS) solutions must be used in Azure.

You need to deploy an Azure environment that meets the company's migration plan.

What should you create?

Options:

A- an Azure App Service and Azure SQL databases

- B-** Azure storage accounts and web server in Azure virtual machines
- C-** Azure virtual machines, Azure SQL databases, and Azure Storage accounts
- D-** an Azure App Service and Azure virtual machines that have Microsoft SQL Server installed

Answer:

A

Question 7

Question Type: MultipleChoice

Which Azure service can you use as a security information and event management (SIEM) solution?

Options:

- A-** Azure Analysis Services
- B-** Azure Cognitive Services
- C-** Azure Sentinel
- D-** Azure information Protection

Answer:

C

Question 8

Question Type: MultipleChoice

You need to be notified when Microsoft plans to perform maintenance that can affect the resources deployed to an Azure subscription.

What should you use?

Options:

A- Azure Monitor

B- Azure Service Health

C- Azure Advisor

D- Microsoft Trust Center

Answer:

B

Explanation:

Azure Service Health provides a personalized view of the health of the Azure services and regions you're using. This is the best place to look for service impacting communications about outages, planned maintenance activities, and other health advisories because the authenticated Service Health experience knows which services and resources you currently use.
