## Question 1

---

**Question Type:** MultipleChoice

---

A cloud service can be hosted by a physical server or a virtual server. When using the failover system mechanism, the same cloud service cannot be hosted by more than one physical server.

Select the correct answer.

**Options:**

---

A- True

B- False

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

A cloud service consumer can access a cloud-based relational database via a cloud service.

Select the correct answer.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

A cloud service built as a SOAP-based Web service will have a service contract that is physically decoupled from the service's logic.

Select the correct answer.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

A cloud service built as a component will have a service contract that is physically coupled to the service's logic.

Select the correct answer.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

Cloud services cannot be built as components that use proprietary technologies, such as Java and .NET. This is because the use of Web-based communication technology is required in order for a service to be cloud-based.

Select the correct answer.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

Cloud service consumers typically use HTTP methods to communicate with cloud-based REST services.

Select the correct answer.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

A

## Question 7

---

**Question Type:** MultipleChoice

---

REST services share a uniform contract and therefore cannot be deployed in cloud environments without a multi-device broker mechanism.

Select the correct answer.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

Cloud services can be built as components because Web-based communication is not an essential requirement for an IT resource to be considered cloud-based.

Select the correct answer.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 9

---

**Question Type: MultipleChoice**

---

A cloud-based REST service is most commonly accessed using which of the following protocols?

Select the correct answer.

**Options:**

---

A- FTP

- B- HTTP
- C- SOAP
- D- RPC

**Answer:**

---

B

## Question 10

---

**Question Type:** MultipleChoice

---
