Options:

A- Collection of SRDF physical relationships

B- Collection of SRDF logical relationships

C- Collection of MSC physical relationships

D- Collection of Replication Groups

Answer:

B

Question 5

Question Type: MultipleChoice

A PowerMax Storage Group has Host I/O limits set at 10000 IOPS. The Port Group contains four ports across different directors. The Dynamic Distribution is set to OnFailure.

What is the maximum IOPS the Storage Group can achieve in the event a switch port being used by one of the director ports fails but the director remains online?

Options:

A- 2500

B- 5000

C- 7500

D- 10000

Answer:

B

Question 6

Question Type: **MultipleChoice**

What is the default data collection interval for TTP collections?

Options:

A- 5 minutes

B- 10 minutes

C- 15 minutes

D- 30 minutes

Answer:

C

Question 7

Question Type: **MultipleChoice**

A storage architect is designing a PowerMax solution. The architect must ensure that the Unisphere server is not directly connected to the arrays.

Which type of Unisphere for PowerMax deployment will achieve the design requirements?

Options:

A- CloudIQ

B- Local Configuration

C- Remote Configuration

D- eManagement

Answer:

A
