Question 1

Question Type: MultipleChoice

What is the recommendation for configuring the virtual disks for EMC Avamar Virtual Edition?

Options:

- A- Thick provisioned with eager zeroed
- B- Thin provisioned with eager zeroed
- C- Thick provisioned with lazy zeroed
- D- Thin provisioned with lazy zeroed

Answer:

A

Question 2

Question Type: MultipleChoice

What is the lowest EMC Avamar Virtual Edition version that will support an average daily change rate of 1.5 GB in a file server environment?

Options:

A- 0.5 TB

B- 1.0 TB

C- 2.0 TB

D- 3.3 TB

Answer:

A

Question 3

Question Type: MultipleChoice

If 9 GB is the average amount of data added to an Avamar Virtual Edition (AVE) in a mixed environment each day, what is the minimum recommended size of the AVE?

Options:

A- 0.5 TB

B- 1.0 TB

C- 2.0 TB

D- 3.3 TB

Answer:

B

Question 4

Question Type: MultipleChoice

An EMC Avamar Virtual Edition server is created using thin provisioned virtual disks. What effect will this have instead of using thick provisioning?

Options:

A- Benchmark results will be inaccurate

- B- Avamar capacity will be reduced
- C- Disk performance will be faster
- D- Memory requirements will be smaller

Answer:

A

Question 5

Question Type: MultipleChoice

What is the minimum physical memory that needs to be allocated to an EMC Avamar Virtual Edition with 2 TB of licensable capacity?

Options:

- A- 3072 MB
- B- 4096 MB
- C- 8192 MB
- D- 16384 MB

Answer:

D

Question 6

Question Type: MultipleChoice

What is the minimum physical memory that needs to be allocated to an EMC Avamar Virtual Edition with 1.0 TB of licensable capacity?

Options:

A- 2048 MB

B- 3072 MB

C- 4096 MB

D- 16384 MB

Answer:

C

Question 7

Question Type: MultipleChoice

A node has failed on a multi-node EMC Avamar grid and is offline. The customer insists on running backups while the replacement is occurring. What can you tell the customer about the impact of running backups during a node replacement procedure?

Options:

- A- Replacement procedure will take significantly longer with backups running
- B- Replacement procedure will be unaffected by running backups
- C- Replacement procedure cannot continue while backups are running
- D- Replacement procedure will take less time with backups running

Answer:

A

Question 8

Question Type: MultipleChoice

Which document should be approved and available to you at the time of a node addition to a customer's EMC Avamar server?

Options:

- A- SVC Qualifier
- B- Healthcheck report
- C- ConnectEMC (SYR) report
- D- Sales order

Answer:

A

Question 9

Question Type: MultipleChoice

Your readiness checks show that a customer's Gen4 Avamar server has entered a read-only status. To avoid data loss, which recommended state should the Avamar server be in before you can continue the "Add Node" procedure?

Options:

- A- Known good controlled state
- B- Read-only state
- C- Steady state
- D- Suspended state

Answer:

A

Question 10

Question Type: MultipleChoice

Under which node replacement option do you need to generate a new EMC Avamar license key?

Options:

- A- When swapping disks from a failed utility node to a new node

- B- When performing a rebuild on an existing utility node
- C- When performing a rebuild on an existing storage node
- D- When swapping disks from a failed storage node to a new node

Answer:

A

Question 11

Question Type: MultipleChoice

You are adding new nodes to an EMC Avamar server. You are now ready to join the new nodes to the GSAN. Which command is used?

Options:

- A- start.nodes
- B- start.dpn
- C- rebuild.nodes
- D- avmaint autorestart

Answer:

A
