- D- You can configure the automatic save function, after saving the upgrade application control is configured as system configuration

### Answer:

---

A, C

## Question 2

---

**Question Type:** MultipleChoice

---

For security priority application environment, should be closed Huawei firewall UTM overload protection function.

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

URL filtering, remote classification list provided and maintained by a third-party classification servers, devices can be synchronous updated automatically or manually from third-party classification servers.

**Options:**

---

A- TRUE

B- FALSE

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

About WEB URL filtering technology audit function, which of the following description is correct? (Choose 3 answers)

**Options:**

---

**A-** URL audit function is used to record the user's HTTP Internet behavior as the basis for the audit.

**Answer:**

---

A, B, D

## Question 5

---

**Question Type: MultipleChoice**

---

Which of the following statement is wrong about NIP?

**Options:**

---

- A-** NIP compare the data packet and application knowledge base, identify specific data flow
- B-** NIP support for specific IP network segment, in a specific time period, for strategy processing
- C-** NIP using leading hardware architecture, FPGA realization of the application layer acceleration, ESP achieve forward acceleration
- D-** NIP Manager supports mail alarm response mode

**Answer:**

---

C

## Question 6

---

**Question Type:** MultipleChoice

---

Which statement is wrong about SA principle configuration?

### Options:

---

- A-** feature detection to identify the different applications by matching message feature and Knowledge Base feature set
- B-** reduces the maximum number of packets detection threshold, can reduce the sas module identification number of packets, thus improve the recognition rate agreement
- C-** There are some protocol packets are carried in other agreements, enable sa whole packet inspection can better detect such messages
- D-** Configure SA associated protocol identification is mainly used for the same data stream signaling channel and data channel associated with the identification , and thus identify protocol

### Answer:

---

B

## Question 7

---

**Question Type: MultipleChoice**

---

What do the common virus behavior characteristics include?(select 3 answers)

**Options:**

---

- A- Download and backdoor characteristics
- B- Information Collection feature
- C- own hidden feature
- D- system attacks characteristics

**Answer:**

---

A, B, C

## Question 8

---

**Question Type: MultipleChoice**

---

After opening IP strategy, found part of the business fails, what are the possible reasons? (Choose 2 answers)

**Options:**

---

- A- message through the firewall only one direction
- B- the same message repeatedly through the firewall
- C- IP omission
- D- heavy traffic cause Bypass features enabled

**Answer:**

---

A, B

## Question 9

---

**Question Type: MultipleChoice**

---

Perform the UTM upgrade in the process of operation, appeared the following information:

Error: Executing the update, please wait.

USG may be executed (choose 3 answers)

**Options:**

---

**A-** online upgrade

**B-** there are business flow being processed

**C-** local upgrade

**D-** install the factory default version

**Answer:**

---

A, C, D
