Question 1

Use the command on the switch to view the status of free mobility deployment, the command is as follows:

For the above command, which of the following descriptions is correct?

Options:

A- The control server address is 10.1.10.34

B- The authentication device address is 10.1.31.78

C- Status is'Working'Indicates that the switch and Controller Linkage is successful

D- current Controller The server is backup n

Answer:
C

Question 2

Regarding WLAN, which of the following descriptions is correct?

Options:

A- WLAN Is to adopt 80211 Technical WiFi

B- WLAN There are two basic architectures: FAT AP with AC+FIT AP

C- AC+FATAP The architecture is suitable for medium and large use scenarios

D- AC+FITAP Autonomous network architecture

Answer:

B

Question 3

Question Type: MultipleChoice

An enterprise has a large number of mobile office employees, and a mobile office system needs to be deployed to manage the employees. The number of employees in this enterprise exceeds 2000 People, and the employees' working areas are distributed all over the country. In order to facilitate management, which deployment method is adopted?

Options:

A- Centralized deployment

B- Distributed deployment

C- Hierarchical deployment

D- Both centralized deployment and distributed deployment are possible

Answer:

B

Question 4

Question Type: MultipleChoice

Which of the following options is about Portal The description of the certification process is correct?

Options:

A- Portal The certification process is only used in Web Certification

B- Server for a terminal Portal Certification will only give one Portal Device sends authentication message

C- Switch received Portal Online message, will give Radius Server send Radius Certification request

D- Portal The authentication message will not carry the result of the security check

Answer:

C

Question 5

Question Type: MultipleChoice

Regarding the strategy for checking the screensaver settings, which of the following descriptions are correct? (Multiple choice)

Options:

A- You can check whether the screen saver is enabled on the terminal

B- You can check whether the screen saver password is enabled

C- Only supports Windows operating system

D- Screen saver settings cannot be automatically repaired

Answer:

A, B

Question 6

Question Type: **MultipleChoice**

Agile Controller-Campus Which deployment mode is not supported?

Options:

A- Centralized deployment

B- Distributed deployment

C- Hierarchical deployment

D- Two-machine deployment

Answer:

D

Question 7

Agile Controller-Campus The system can manage the software installed on the terminal, define the black and white list of software, and assist the terminal to install necessary software and uninstall the software that is not allowed to be installed by linking with the access control equipment,Regarding the definition of black and white lists, which of the following statements is correct?

Options:

A- Check for prohibited software licenses and sub-licensed software

Answer:

B

Question 10

Question Type: **MultipleChoice**

Terminal security access technology does not include which of the following options?

A- Access control

B- safety certificate

C- Authentication

D- System Management

Answer:

D

Question 11

Question Type: **MultipleChoice**

Hardware in useSACG At the time of certification,SACG After the configuration is completed, you can seeSACG andAgile Agile Controller-Campus The linkage is successful, but the user authentication fails. This phenomenon may be caused by the following reasons? (Multiple choice)

Options:

A- User flow has not passed SACG.

B- SACG There is no release on the user stream.

C- SACG There is no closed state detection on it.

D- Agile Controller-Campus On and SACG Wrong key configuration for linkage

Answer:

B, C

Question 12

Install Agile Controller-Campus Which of the following steps do not need to be completed before?

Options:

A- Install the operating system

B- Install the database

C- Install antivirus software

D- Import License

Answer:

D
