Question 1

What other systems can be integrated between Huawei's video surveillance system and Huawei to form a combination to deal with market competition ()

Options:

A- Video conference

B- eLTE

C- cloud

D- Integrated command

Answer:

A, B, C, D

Question 2

X2331-EPL and X2391-EPL camera models are mainly used in application scenarios such as intersections, expressways, and traffic management. Which of the following parameters can be used to guide project bids. ()

Options:

A- Use no less than 1' 900/300 pixel GSCMOS image sensor, and the image resolution supports 40962160/20481536;

B- Built-in electric zoom lens, focal length range not less than 11-40mm, support P-Iris automatic iris;

C- Support the intelligent module to be upgraded separately, and the video picture will not be lost during the process;

D- Support vehicle feature recognition function within the field of view angle 80, including license plate, body color, car model, etc.;

E- Support image diagnosis of snowflakes, color cast, image freezing, gain imbalance, camera shake, streak noise, image loss, video occlusion and other setting options;

Answer:

A, B, C, D, E

Question 3

Question Type: **MultipleChoice**

X series star camera general control parameters ()

Options:

A- Image quality diagnosis

B- Scene adaptation

C- The smart module is greatly upgraded

D- KMC security key + code stream encryption technology

Answer:

A, B, C, D

Question 4

Question Type: **MultipleChoice**

What are the types of intelligent analysis suitable for the front-end camera?

Options:

A- Video retrieval

B- License plate recognition

C- Face monitoring

D- behavior analysis

Answer:

B, C, D

Question 5

Question Type: MultipleChoice

The future trend of monitoring is edge computing. What are the advantages of front-end intelligent analysis?

Options:

A- Small delay

B- There is no requirement for algorithm performance

C- No bandwidth requirements

D- Strong real-time

Answer:

A, C, D

Question 6

Question Type: MultipleChoice

What behaviors does the video vehicle violation detection include?

Options:

A- Driving in reverse

B- Illegal parking

C- Vehicle overload

D- Vehicle super high

E- Model size

Answer:

A, B

Question 7

Question Type: MultipleChoice

The value of GB/T28181-2011 standard to customers in the construction of a safe city is reflected in:

Options:

A- Deepen the application of GIS in intelligent transportation

B- Platform interconnection to achieve large-scale networking

C- Defines the calling interface of the monitoring system's business capabilities, so that the non-monitoring business system can conveniently call the monitoring resources and realize the integration of different businesses

D- Promote the standardization of signaling and media to break silos

Answer:

B, C, D

Question 8

Question Type: **MultipleChoice**

In the construction of domestic safe city projects, which of the following scenarios is applicable to the GB/T28181-2011 standard?

Options:

A- The standard protocol that the platform and the front-end equipment need to comply with

B- Standard protocols that the video surveillance platform needs to comply with for networking

C- Standard agreements that need to be followed for platform interconnection and resource integration

D- Standard protocols that need to be complied with for interconnection between the video surveillance platform and the public security business application system

Answer:

A, B, C, D

Question 9

Question Type: **MultipleChoice**

Which of the following items can be detected by the HD mount?

Options:

A- License plate number

B- Driver's face

C- Vehicle speed

D- Body color

Answer:

A, B, C, D

Question 10

Question Type: **MultipleChoice**

Among the following four newly released X-series cameras, which cameras support the face capture function?

Options:

A- X1221-V

B- X1281-F

C- X2321-VG

D- X1221-C

Answer:

B, C
