Question 1

Question Type: MultipleChoice

During a backlog refinement meeting, the team uses the appropriate technique to focus discussion on backlog items and their:

Options:

- A- Technical designs and related details
- B- Related users, user goals, user activities and their importance
- C- Estimates determined by the delivery team
- D- Resource requirements and availability for work.

Answer:

D

Question 2

Question Type: MultipleChoice

Through ongoing collaboration with stakeholders the team continues to uncover new information. This is leading to changes to the products that are being produced. The team should:

Options:

- A- Stop all work until stakeholders can decide what they need
- B- Schedule additional review sessions to speed up stake holder decisions
- C- Accept all changes but delay additional solution development work to minimize rework
- D- Continue as is since the process is working

Answer:

B

Question 3

Question Type: MultipleChoice

A practice common to most agile approaches is to require that the items in the product backlog that are targeted to be delivered next, are:

Options:

- A- Loosely prioritized with some having the same priority
- B- Strictly prioritized, and sequenced from smallest to largest work effort
- C- Unprioritized, but with known business value
- D- Strictly prioritized and forced ranked

Answer:

B

Question 4

Question Type: MultipleChoice

The team is open to receiving feedback on the product it's creating and the processes it uses to create those products. Furthermore, they're using this feedback to improve every aspect of the work. This shows the team has embraced the concept of:

Options:

- A- Acting on changes while working on the solution

- B- Listening to customers at predefined intervals
- C- Documenting customer driven feedback
- D- Uncovering better ways of delivering solutions

Answer:

B

Question 5

Question Type: MultipleChoice

The team is delivering a high priority solution component and is discovering new information about the need and how well the work being delivered satisfies it. They conclude that learnings from this component will be used to:

Options:

- A- Refine the components
- B- Explain the components
- C- Implement the components

D- Descope the components

Answer:

A

Question 6

Question Type: MultipleChoice

During a project to improve efficiency at a customer service center, the product owner has established that a 15% improvement from the start on each of a specific set of 5 measures is the

target for a particular initiative. They meet this goal and move on to a new initiative. Having a metric and a target helped them do what activity?

Options:

A- Analyze to determine what is valuable

B- Assess stakeholder compliance

C- Determine if the need is satisfied

D- Prioritize the next initiative

Answer:

A

Question 7

Question Type: MultipleChoice

The delivery team is discussing how to achieve the strategic goals for their work. They determine the following analysis technique is important to help the team maintain its focus:

Options:

A- Relative estimation

B- Spikes

C- Story elaboration

D- Visioning

Answer:

D

Question 8

Question Type: MultipleChoice

Backlog items that are dependent on other backlog items compromise and limit rapid decision making, fast delivery and strategic alignment by not leveraging:

Options:

A- Feedback loops

B- Daily standups

C- Retrospectives

D- Thinking like a customer

Answer:

A

Question 9

Question Type: MultipleChoice

Wanting to ensure the delivery team is working as productively as possible, they decide backlog items, including user stories, should be:

Options:

- A- Fully detailed before they get prioritized
- B- Refined and elaborated by the Tech Lead
- C- Refined and elaborated throughout the planning horizons
- D- Fully detailed as they enter the backlog

Answer:

C

Question 10

Question Type: MultipleChoice

Agile business analysis focuses on producing something, showing it to stakeholders, and eliciting immediate feedback. This demonstrates the following characteristic of working in an agile context:

Options:

- A- Systems approach
- B- Focused nature
- C- Empirical nature
- D- Planned approach

Answer:

D

Question 11

Question Type: MultipleChoice

The team is assessing feedback from the work that's been completed. After some discussion they realize this feedback can be used to assess the remaining components that are yet to be built. Specifically, this feedback can be used to help them determine if the initiative's remaining solution components are:

Options:

- A- Impacting other initiatives
- B- Supported by management
- C- Likely to be completed
- D- Still appropriate

Answer:

D
