## Question 1

---

**Question Type:** MultipleChoice

---

Your Junos device is configured with dual Routing Engines.

In this scenario, which feature must be activated to preserve both the control and forwarding planes?

### Options:

---

- A- graceful Routing Engine switchover only
- B- graceful Routing Engine switchover with graceful restart and non-stop routing
- C- graceful Routing Engine switchover with graceful restart
- D- graceful Routing Engine switchover with non-stop routing

### Answer:

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

What are two overlay protocols that should be considered in your data center design when using an IP fabric underlay? (Choose two.)

**Options:**

---

- A- OSPF
- B- VXLAN
- C- MPLSoGRE
- D- VPLS

**Answer:**

---

B, D

## Question 3

---

**Question Type: MultipleChoice**

---

Which three statements about Contrail Networking are true? (Choose three.)

### Options:

---

- A- It is used to service chain network functions.
- B- It is used to program physical network functions.
- C- It is used to virtualize and program networks.
- D- It is used to virtualize and program compute.
- E- It is used to create distributed cloud storage.

### Answer:

---

A, C, E

## Question 4

---

### Question Type: MultipleChoice

---

Two data centers must be able to operate with a stretched Layer 2 network. You are concerned about unnecessary traffic on the Data Center Interconnect (DCI). You do not want packets to trombone over the DCI, have excessive unknown unicast packet flooding over the DCI, or have excessive ARP flooding over the DCI.

Which technology satisfies the requirements in this scenario?

**Options:**

---

- A- EVPN
- B- IPsec
- C- VPLS
- D- GRE over IP

**Answer:**

---

A

## Question 5

---

**Question Type: MultipleChoice**

---

You have a heavily virtualized environment in which all of your virtual machines are hosted on a few large, shared servers. For security reasons, you must restrict inter-VM traffic and only allow traffic that complies with your security policies.

Which two technologies would you use to restrict inter-VM traffic? (Choose two.)

**Options:**

---

- A- URL filtering
- B- security intelligence
- C- vSRX
- D- VLAN

**Answer:**

---

C, D

## Question 6

---

**Question Type:** MultipleChoice

---

You are responsible for the uptime of a Clos IP fabric that has an EBGP implementation. When the EBGP implementation is restarted on a router, it causes a routing flap.

In this scenario, which BGP feature would prevent downtime?

**Options:**

---

- A- EBGP multihop

- B- BGP route preference
- C- EBGP local preference
- D- BGP graceful restart

**Answer:**

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

You are performing a risk assessment on your new data center. You must determine the annual loss expectancy.

Which two calculations must you use in this scenario? (Choose two.)

**Options:**

---

- A- single loss expectancy
- B- asset value

C- annual rate of occurrence

D- exposure factor

**Answer:**

---

A, B
