Question 1

Question Type: MultipleChoice

A company has decided to implement RDS Application Pools. Its current server standard is Windows Server 2008 R2. The application requires access to a client USB device.

What must be done to allow USB redirection for this setup?

Options:

- A- Install new RDS servers using Windows Server 2012 R2.
- B- Install View Client on user device with USB redirection feature enabled.
- C- Install VMware User Environment Manager.
- D- Install View Agent on existing RDS Servers and select USB redirection to be included.

Answer:

A

Question 2

Question Type: MultipleChoice

Company A decides to set up a Proof of Concept (POC) environment for VMware Horizon View 7 Advanced. During the base image creation, all the necessary applications and software were installed. The POC was successful and Company A is interested in setting up a View Desktop Pool for a User Acceptance Test (UAT), but a decision was made to use instant clones. When creating a new desktop, the option to use instant clone is greyed out. The same base image has to be used.

Which two steps must be taken to use instant clones for UAT in Company A? (Choose two.)

Options:

- A-** Reinstall View Connection Servers
- B-** Apply new Horizon View 7 Enterprise license.
- C-** Create a new base image using a supported operating system for instant clones.
- D-** Reinstall View Agent and choose VMware Horizon Instant Clone Agent.

Answer:

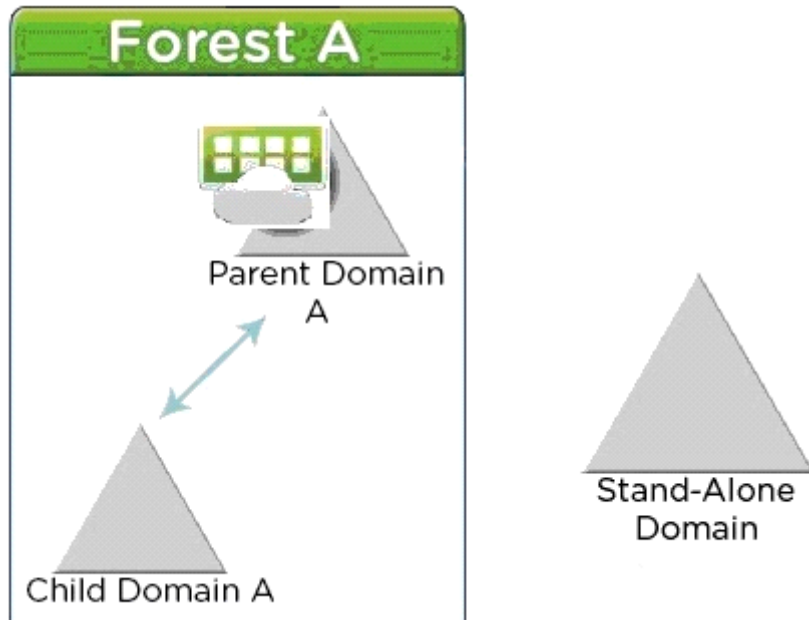

B, C

Question 3

Question Type: MultipleChoice

An architect has been asked to evaluate the existing Active Directory infrastructure to implement a Horizon 7-based virtual Desktop infrastructure.

The Active Directory Admin helped the architect create the attached exhibit related to the current Active Directory.

The customer specified these requirements:

- * Extend the same Horizon 7 infrastructure to a 20 User Organization from Stand-Alone Domain.
- * Two users from the Stand-Alone Domain must have Administration access to Horizon View Infrastructure.

The architect has been asked to recommend Active Directory changes with a constraint of least possible trust relationship and credential duplication to meet the additional requirement.

Referring to the exhibit, which two recommendations would enable Active Directory infrastructure to meet requirements?

Options:

- A- Configure Secondary credential for View administration users only.
- B- Establish two-way trust relationship between Parent Domain A and Stand-Alone Domain.
- C- Establish one-way trust relationship between Parent Domain A and Stand-Alone Domain.
- D- Configure Secondary credential for View Desktop users only.
- E- Configure Secondary credential for View Desktop users and View Administration Domain.

Answer:

A, C

Question 4

Question Type: MultipleChoice

A company has a use case for instant clones and 3D NVIDIA video cards. The current environment consists of Horizon 7.0 and vSphere 6.5.

In which design standard category does the scenario fit?

Options:

A- Assumption

B- Requirement

C- Risk

D- Constraint

Answer:

B

Question 5

Question Type: MultipleChoice

Which should be used to reduce vCenter Server overhead and improve performance in a large scale App Volumes deployment?

Options:

A- AppToggle

B- Mount on Host

C- Mount Local

D- Storage Groups

Answer:

B

Question 6

Question Type: MultipleChoice

Which three options need to be considered when implementing multiple vCenter Server in App Volumes 2.x? (Choose three.)

Options:

- A- Datastore names must be unique.
- B- Each vCenter must use the same credentials.
- C- Host names must be unique.
- D- Portgroups must be unique.
- E- Each vCenter must support Cross vCenter VMotion.

Answer:

A, C, D
