Question 1

Question Type: MultipleChoice

In the war against ransomware, a company decided to implement tape backup for the first time. The tape library has already been added. Of the following, what must be done first?

Options:

A- Create vaults.
B- Create media pools.
C- Create libraries.
D- Create media sets.

Answer:

B

Question 2

Question Type: MultipleChoice

Which Veeam Backup & Replication functionality allows a VM to be powered on directly from a backup file?

Options:

A- Planned failover
B- Instant VM Recovery
C- Item-Level Recovery using Veeam Explorer
D- Full VM Recovery

Answer:

B

Question 3

Question Type: MultipleChoice

On Monday, a backup administrator found out that some backup jobs were missing from a configuration. They want to roll back the configuration database to Fridays state. Which configuration restore mode should be used?

Options:

A- Instant SQL Recovery
B- Veeam Explorer for Microsoft SQL
C- Restart
D- Migrate

Answer:

C

Explanation:

https://helpcenter.veeam.com/docs/backup/vsphere/vbr_config_restore.html?ver=120

Question 4

Question Type: MultipleChoice

A daily backup job for seven Hyper-V VMs has been configured at the main site, keeping 14 days' worth of backup files. They want to get a copy of the VM backups to a repository at the disaster recovery site. They want to keep six months' worth of backup files at the disaster recovery site. They also need to be able to restore the VMs to any given day within two months and any given week within six months. How should a backup copy job be configured to meet these requirements?

Options:

A- Use periodic copy (pruning) mode, keeping 180 days of retention.
B- Use immediate copy (mirroring) mode, keeping 62 days of retention and 26 weekly GFS restore points.
C- Use periodic copy (pruning) mode, keeping 62 days of retention and six monthly GFS restore points.
D- Use immediate copy (mirroring) mode, keeping 180 days of retention.

Answer:

B

Explanation:

According to the Veeam Backup & Replication user guide1, you can use along-term retention policy (GFS)to keep backup files for longer periods of time.GFS stands forgrandfather-father-sonand refers to a backup rotation scheme that allows you to create weekly, monthly, quarterly and yearly restore points12.

Therefore, if you want to be able to restore the VMs to any given day within two months and any given week within six months, you should use a GFS policy with 62 days of retention and 26 weekly GFS restore points. The simplest configuration would be an immediate copy (mirroring) mode with these settings (option B).

Question 5

Question Type: MultipleChoice

An infrastructure with 50 VMs has a power outage. After the VMware cluster has booted up again, 10 medium-sized VMs have corrupted VM disk files. Which action can be used to restore the VMs back to the production state?

Options:

A- Use the 'Restore guest files' option and restore all VM Files.
B- Perform Restore VM Files and only restore the VM configuration files.
C- Perform Restore VM Files and restore the VM configuration and disk files.
D- Perform Instant VM Recovery with quick rollback.

Answer:

B

Explanation:

By performing a restore of only the VM configuration files, you can quickly recreate the VM in VMware vSphere using the existing disk files on the datastore. This method avoids the need to transfer or copy large VM disk files, resulting in a faster restoration process. Note that this method assumes that the VM disk files are still intact on the datastore. If any of the VM disk

files are missing or corrupted, you may need to consider alternative restoration methods or perform a full restore from the Veeam backup files.

Topic 2, Exam Pool 2

Question 6

Question Type: MultipleChoice

A backup administrator decided to move the Veeam Backup & Replication server and configuration database to new servers. Which configuration restore mode should be used?

Options:

A- Migrate
B- Planned failover
C- Restore
D- Failover plan

Answer:

A

Explanation:

https://helpcenter.veeam.com/docs/backup/vsphere/vbr_config_migrate.html?ver=120#step5

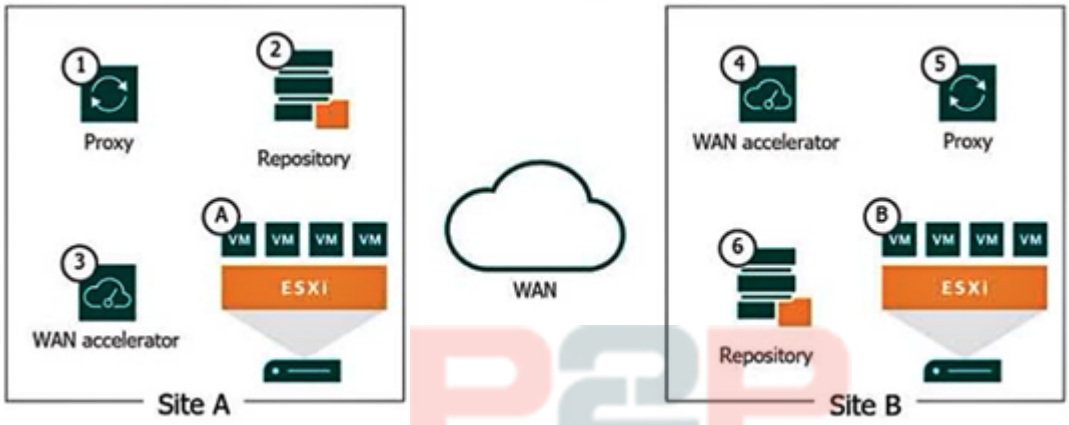

The 'Migrate' mode is designed specifically for scenarios where you need to move the Veeam Backup & Replication server and its configuration database to new servers or locations. It ensures a smooth transition without data loss or service interruption. This mode allows you to migrate the entire configuration seamlessly.

Question 7

Question Type: MultipleChoice

Backup jobs are configured to local repositories. Backups must be sent from Site B to the repository on Site

A The connection allows direct backups to complete within the backup window. Impact on the source VMs at Site B should be minimized. Which type of job and Veeam components should be used to provide the necessary protection?

Options:

A- A backup copy job and components 6 5 4 3 2
B- A backup job and components 5 2
C- A backup copy job and components 6 2
D- A backup copy job and components 6 4 2

Answer:

A

Explanation:

https://helpcenter.veeam.com/docs/backup/vsphere/backup_copy_path.html?ver=120

Question 8

Question Type: MultipleChoice

Which of the following Veeam Backup & Replication jobs can utilize storage snapshots on VMware vSphere?

Choose two options.

Options:

A- Replication
B- Backup copy
C- VeeamZIP
D- Backup
E- Tape
F- VM copy

Answer:

A, D

Question 9

Question Type: MultipleChoice

A company needs to ensure that, during a disaster, a group of VMs starts in a certain order with time deploys between starting each VM. How can this be accomplished?

Options:

A- Create a failover template file for the group of VMs.
B- Create a replica chain in the Veeam Backup & Replication console.
C- Create a failover plan.
D- Perform a planned failover.

Answer:

C

Question 10

Question Type: MultipleChoice

To view current information about the entire Veeam backup Infrastructure, including alarms and the status of jobs, use Veeam ONE'S_____.

Options:

A- Data Protection View

B- Business View
C- Enterprise View
D- Report View

Answer:

A

Question 11

Question Type: MultipleChoice

When deploying an advanced single-host virtual lab in a VMware environment, what will Veeam create?

Options:

A- A distributed virtual switch with uplink(s)
B- A standard virtual switch with uplink(s)
C- A distributed virtual switch without uplink(s)
D- A standard virtual switch without uplink(s)

Answer:

B

Question 12

Question Type: MultipleChoice

At 18:00, after a power outage, a VM is stuck in an infinite boot loop. The VM is configured as follows.

Platform	VMware vSphere
Application	IIS Web Server
Disk 1 (OS)	60 GB, CBT enabled
Disk 2 (DATA)	400 GB, CBT enabled

The last backup was created at 01:00. Choose the recovery approach that results in the least

amount of data loss and lowest chance of data corruption.

Options:

A- VM disk recovery
B- Instant VM Recovery
C- Instant VM Recovery with quick rollback
D- VM disk recovery with quick rollback

Answer:

B
