## Question 1

---

**Question Type:** MultipleChoice

---

Which three statements about Versa head-end component deployment are true? (Choose three.)

### Options:

---

- A- The components can be deployed on a bare metal server.
- B- The components can be deployed as a mix of bare metal and virtual machines.
- C- The components can be deployed as virtual machines.
- D- The components can be deployed as bare metal on non-x86 appliances.

### Answer:

---

A, B, C

## Question 2

---

**Question Type:** MultipleChoice

---

A customer has a site activation planned using script-based provisioning; however, while unboxing the SD-WAN CPE, the engineer notices that the console cable is missing.

In this scenario, what would an engineer do to initiate the script-based provisioning?

**Options:**

---

- A- Connect a laptop to any LAN port on the device.
- B- Connect a laptop to any WAN port on the device.
- C- Connect a laptop to the management port on the device.
- D- Connect a laptop to the auxiliary port on the device.

**Answer:**

---

C

## Question 3

---

**Question Type:** MultipleChoice

---

A group of users notified you that they are experiencing a network outage.

In this scenario, which two Versa components would you use to verify the live status of the WAN links? (Choose two.)

**Options:**

---

- A- Versa Director device monitoring dashboard
- B- Versa Analytics SD-WAN dashboard
- C- Versa Director troubleshooting tools
- D- Versa Analytics sites availability dashboard

**Answer:**

---

A, D

## Question 4

---

**Question Type:** MultipleChoice

---

Your Versa CPE security policy rule is configured to generate and send logging information on policy hits using Default Logging Profile.

In this scenario, which Versa component would allow you to view the logs?

**Options:**

---

- A- Versa Analytics
- B- Versa Director
- C- Versa Controller
- D- Versa Secure Access Gateway

**Answer:**

---

A

## Question 5

---

**Question Type: MultipleChoice**

---

Which two statements about Versa Secure Access (VSA) are true? (Choose two.)

**Options:**

---

- A- The VSA gateway is always hosted in a public cloud.

- B-** LDAP can be used to authenticate remote secure access users.
- C-** VSA supports multi-factor authentication.
- D-** The VSA client does not support split tunneling.

**Answer:**

---

B, C

## Question 6

---

**Question Type: MultipleChoice**

---

You are asked to configure an SD-WAN branch so that Internet bound traffic uses the local Internet link.

In this scenario, which template provides this configuration?

**Options:**

---

- A-** QoS Template
- B-** Application Template

**C-** Post-staging Template

**D-** Service Chain Template

**Answer:**

---

C

## Question 7

---

**Question Type: MultipleChoice**

---

An administrator wants to have a daily report of the bandwidth usage for all sites in the network without logging into the Versa Analytics portal.

In this scenario, which statement is true?

**Options:**

---

**A-** Versa Analytics can generate customized daily reports, but it cannot send the reports to the administrator.

**B-** Versa Analytics can generate and schedule customized reports by e-mail, based on a user-defined reporting template.

**C-** The e-mail schedule needs to be defined on the Versa Director to trigger reports in Versa Analytics.

**D-** Versa Director can generate customized reports by e-mail, based on a pre-configured reporting template.

**Answer:**

---

C

## Question 8

---

**Question Type: MultipleChoice**

---

Which two components are required when creating a device using workflows? (Choose two.)

**Options:**

---

**A-** Device Template

**B-** Common Template

**C-** Device Group

**D-** Service Template

**Answer:**

---

A, C

## Question 9

---

**Question Type:** MultipleChoice

---

By default, when configuring DIA through workflows, which protocol runs between the tvi interfaces connecting an Internet VR with the LAN VRF?

### Options:

---

**A-** static routing

**B-** OSPF

**C-** BGP

**D-** VRRP

### Answer:

---

C

## Question 10

---

**Question Type:** MultipleChoice

---

You are asked to implement a third-party application server as a virtual machine on Versa CPE.

In this scenario, which template would you use to accomplish this task?

### Options:

---

- A- Stateful Firewall Template
- B- Common Template
- C- Application Steering Template
- D- Service Chain Template

### Answer:

---

C
