## Question 1

---

**Question Type:** MultipleChoice

---

An administrator is tasked to allow the organization's users to consume vRealize Automation services.

Which solution is used for this configuration?

**Options:**

---

A- vCenter Server

B- Active Directory

C- vRealize Suite Lifecycle Manager

D- Workspace ONE Access

**Answer:**

---

C

## Question 2

---

**Question Type:** MultipleChoice

---

Which vRealize Operations component should be deployed to a secondary site to ensure vRealize Operations can receive data from an edge vCenter Server?

**Options:**

---

- A- Remote Collector node
- B- Witness node
- C- Secondary node
- D- Analytics node

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

An operator has been tasked with powering on a single virtual machine that has been onboarded, along with a number of additional virtual machines, into a single deployment within vRealize Automation. The virtual machine was onboarded in a powered-off state.

Which two actions could the operator take to complete the task? (Choose two.)

**Options:**

---

- A-** Locate the deployment in vRealize Automation, and use the Power On Day 2 action.
- B-** Locate the virtual machine in vRealize Log Insight, and use the Power On action.
- C-** Locate the deployment in vRealize Operations, and use the Power on action.
- D-** Locate the virtual machine in vRealize Operations, and use the Power On action.
- E-** Locate the virtual machine in vRealize Automation, and use the Power On Day 2 action.

**Answer:**

---

B, D

**Explanation:**

---

## Question 4

---

**Question Type: MultipleChoice**

---

An administrator is troubleshooting an application via Workbench in vRealize Operations Manager and would like to only view root causes.

Which option must the administrator select?

**Options:**

---

- A- Specify Time Range
- B- Decrease Object Scope
- C- Hide Consequential Evidence
- D- Investigate Property Changes

**Answer:**

---

A

## Question 5

---

**Question Type: MultipleChoice**

---

Which two roles does vRealize Operations Manager provide? (Choose two.)

**Options:**

---

- A- Breach Monitoring
- B- Performance Monitoring
- C- Network Flow Monitoring
- D- Application Monitoring
- E- Log Monitoring

**Answer:**

---

B, D

## Question 6

---

**Question Type:** MultipleChoice

---

An administrator has re-logged on to vRealize Operations Manager and would like to continue reviewing an active troubleshooting for a VM in Workbench.

What must the administrator perform to continue the investigation?

**Options:**

---

- A-** Sessions do not persist after the user logs out from vRealize Operations Manager.
- B-** The administrator must contact VMware support to retrieve the latest session information vRealize Operations Manager.
- C-** Sessions can be imported based on an export prior to the user logging out of vRealize Operations Manager.
- D-** Sessions are persisted after the user logs out from vRealize Operations Manager.

**Answer:**

---

A

## Question 7

---

**Question Type: MultipleChoice**

---

A user would like to automate the update of an already-deployed application that is using a blue-green deployment model and also minimize downtime for the application.

Which strategy would meet these requirements?

**Options:**

---

- A-** Create a pipeline in Code Stream that uses a Bamboo task to manage the blue and green instances.
- B-** Create a pipeline in Code Stream with separate stages for the blue and green instances.
- C-** Create a single cloud template in Cloud Assembly to deploy the blue and green instances.
- D-** Create separate cloud templates in Cloud Assembly for the new version of the application.

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

Which component can be monitored with the dashboards in the VMware SDDC Health Monitoring Solution?

**Options:**

---

- A- VMware Horizon
- B- vRealize Network Insight
- C- VMware Site Recovery Manager
- D- VMware Tanzu

**Answer:**

---

C

## Question 9

---

**Question Type:** MultipleChoice

---

Which two configurations are required to allow virtual machines to be deployed into a VMware Cloud Foundation solution? (Choose two.)

**Options:**

---

- A- The SDDC Manager integration
- B- A SDDC Manager Cloud Account
- C- A VMware Cloud Foundation Cloud Account

**D-** The VMware Cloud Foundation integration

**E-** A VMware NSX-v Cloud Account

**Answer:**

---

A, D

## Question 10

---

**Question Type:** MultipleChoice

---

Which two types of content can be included when creating a custom dashboard? (Choose two.)

**Options:**

---

**A-** Reports

**B-** Widgets

**C-** Logs

**D-** Views

**E-** Scenarios

**Answer:**

---

A, B

## Question 11

---

**Question Type:** MultipleChoice

---

To reduce the possibility of unnecessary outages to critical production applications, an administrator has been tasked with ensuring that all shut down and reboot Day 2 operations for deployments within a project are only completed if the service owner gives permission.

Which type of Service Broker policy should an administrator configure to meet this objective?

**Options:**

---

**A-** Resource Quota

**B-** Lease

**C-** Day 2 Action

**D-** Approval

**Answer:**

---

C
