# Question 1

---

## Question Type: MultipleChoice

---

Scenario: 2

After completing the branch activation for all required branches, the network administrator attempts to test connectivity between the various branches and between hubs and branches. The administrator notices a lack of connectivity despite being certain that configurations have been complete. The administrator also observed that several users are reporting intermittent connectivity to some of the some applications they are accessing. Other users are reporting no access to these applications. Other users at some of the branches claim they cannot get to certain public resources. The administrator wants to ensure that all sites can talk to each other and all resources are accessible.

Exhibit.

Image not found or type unknown

A technician has added Edges to an East Coast Profile. These Edges are not able to communicate via dynamic tunnels to Edges in the West\_Coast profile. The technician has noticed that some Edges are able to establish dynamic tunnels.

What could be preventing Edges from being able to establish dynamic tunnels?

**Options:**

---

- A) The profiles are not configured to allow dynamic branch to branch VPNs.
- B) The profiles are configured to only allow dynamic branch to branch for Edges within the same profile.
- C) None of the existing profiles have Cloud VPN enabled thus preventing dynamic tunnels.
- D) Neither profile has been configured to utilize cloud gateways.

**Answer:**

---

A

## Question 2

---

**Question Type:** MultipleChoice

---

Scenario: 2
