Question 1

Question Type: MultipleChoice

An administrator is configuring a load balancer for multiple VMware Cloud Director appliances for the console proxy.

Which port number should the administrator use?

Options:

- A- 443
- B- 902
- C- 8443
- D- 5480

Answer:

C

Explanation:

The VMware Cloud Director appliance uses its eth0 IP address with custom port 8443 for the console proxy service.

Question 2

Question Type: MultipleChoice

What must a cloud provider administrator do to extend the number of ESXi hosts within a Provider VDC?

Options:

- A- Add the ESXi hosts to the vSphere cluster that backs the provider VDC, and navigate to the Infrastructure Resources. Then, select Hosts, and click autodiscover.
- B- Add the ESXi hosts to the vSphere cluster that backs the provider VDC.
- C- Within Cloud Director, navigate to the Infrastructure Resources, select Hosts, and click add.
- D- Add the ESXi hosts to the vSphere cluster that backs the provider VDC, and validate that the Cloud Director installs the proper VIBs.

Answer:

B

Question 3

Question Type: MultipleChoice

Which statement is accurate for virtual machines that need to be customized by VMware Cloud Director?

Options:

- A- It must use the VMware Tools for VMware Cloud Director.
- B- It should use only the tools provided by Windows operating system.
- C- It must be converted into VMware Cloud Director disk format first.
- D- It should have the latest VMware Tools installed.

Answer:

D

Explanation:

<https://docs.vmware.com/en/VMware-Cloud-Director/10.4/VMware-Cloud-Director-Tenant-Portal-Guide/GUID-2D21BDFA-FADB-445A-8CB5-3628255773AC.html>

Question 4

Question Type: MultipleChoice

A fresh deployment of the VMware Cloud Director appliance has failed.

Which log file will provide more information on the issue?

Options:

- A- /var/vmware/vpostgres/current/pgdata/log
- B- /opt/vmware/var/log/firstboot
- C- /var/log/messages
- D- /opt/vmware/vcloud-director/logs/cell.log

Answer:

B

Explanation:

/opt/vmware/var/log/firstboot Contains logging information related to the first boot of the appliance.

Question 5

Question Type: MultipleChoice

Which NSX-T resource can be used to back a VMware Cloud Director External Network?

Options:

- A- Edge Cluster
- B- Network Segment
- C- Tier-0 Logical Router
- D- Tier-1 Logical Router

Answer:

C

Explanation:

<https://docs.vmware.com/en/VMware-Cloud-Director/10.0/com.vmware.vcloud.spportal.doc/GUID-B937681E-329C-42D4-99BD-FAFF2A0BDF4C.html>

Question 6

Question Type: MultipleChoice

A customer requires VM encryption.

Which action must be taken to provide this feature?

Options:

- A- Upgrade the vCenter Server to at least version 7.0.
- B- Encrypt the VM directly from vCenter Server, as it is transparent to VMware Cloud Director.
- C- In the vCenter Server, add a KMS > enable encryption policy > in VMware Cloud Director, add policy to Provide VDC > add policy to Organization VDC.
- D- Add a KMS to VMware Cloud Director > create encryption policy > add policy to Organization VDC.

Answer:

B

Explanation:

<https://docs.vmware.com/en/VMware-Cloud-Director/10.3/VMware-Cloud-Director-Service-Provider-Admin-Portal-Guide/GUID-BCF6A4CD-6753-42B9-B160-967EBC0F124B.html#GUID-BCF6A4CD-6753-42B9-B160-967EBC0F124B>

Question 7

Question Type: MultipleChoice

The runtime lease of a virtual machine is about to expire. The administrator would like to extend the lease time.

Which action should be taken to complete this task?

Options:

- A- Renew the lease from the vApp action menu.
- B- Extend the storage lease, and runtime will automatically be extended.

- C- Use the /api/renewlease endpoint to define a new lease time.
- D- Renew the VM lease only after renewing the vApp lease.

Answer:

A

Question 8

Question Type: MultipleChoice

An administrator is configuring a load balancer for multiple VMware Cloud Director appliances for the console proxy.

Which port number should the administrator use?

Options:

- A- 443
- B- 902
- C- 8443
- D- 5480

Answer:

C

Explanation:

The VMware Cloud Director appliance uses its eth0 IP address with custom port 8443 for the console proxy service.

Question 9

Question Type: MultipleChoice

What are three components in the VMware Cloud Director Availability solution that are used to enable migration from an on-premises data center to a service provider's VMware Cloud Director environment over the internet? (Select three.)

Options:

- A- Cloud Replicator Appliance
- B- Cassandra database
- C- RabbitMQ Server
- D- VMware Cloud Director Availability On-Premises Appliance
- E- Standalone Edge Appliance
- F- Cloud Tunnel Appliance

Answer:

A, D, F

Question 10

Question Type: MultipleChoice

Which statement describes the function of a VMware Cloud Director Availability replication policy?

Options:

- A- It defines and controls the replication attributes and is controlled by the tenant.
- B- It defines and controls the replication attributes and is controlled by the on-premises vSphere environment.
- C- It defines and controls the type of compatible guest operating systems.
- D- It defines and controls the replication attributes and is controlled by the service provider.

Answer:

D

Question 11

Question Type: MultipleChoice

An administrator has vCenter Server clusters that will be providing resources to VMware Cloud Director.

Which setting is a requirement?

Options:

- A- Fully Automated DRS
- B- vCenter HA
- C- Storage DRS
- D- vSphere HA

Answer:

A
