Question 1

Question Type: MultipleChoice

A customer is deploying Horizon View 7.1 utilizing a Cloud Prod Architecture. The customer wants to utilize 32-node clusters, and a single vCenter at each site to support 9,500 desktops per site.

Which two statements about this configuration are true? (Choose two.)

Options:

- A- This configuration allows all desktops at a site to be provisioned from a single master image.
- B- This configuration allows multiple pools to be grouped together using global entitlements.
- C- This configuration requires a 64-node cluster per site.
- D- This configuration exceeds the maximum supported size for a View block.

Answer:

B, D

Question 2

Question Type: MultipleChoice

The CIO of a company has asked that a review of all user's applications be undertaken to improve storage usage. After the review, it was found that a number of applications are used by several different organizations within the company. These applications are currently all installed in all of the different master images, making each of the master images very large.

What VMware technology would improve storage usage?

Options:

- A- VMware FLEX
- B- VMware Mirage
- C- Horizon Published Applications
- D- VMware Identity Manager

Answer:

C

Question 3

Question Type: MultipleChoice

A company has decided to virtualize all of its helpdesk employee's workstations.

These requirements must be met:

- * All applications used by the employees will be published through RDS hosted application.
- * Users will NOT be allowed to store any personal data on their Horizon desktops.
- * The Horizon desktop design should meet maximum storage space efficiency.
- * The Horizon desktop design should meet maximum performance.
- * The Horizon desktop design should meet maximum power savings.

Which three features can be enabled to meet the company's requirements? (Choose three.)

Options:

- A- Full clones
- B- Instant clones
- C- Space Efficient disk format (SEsparse)
- D- Content-based read cache (CBRC)
- E- Virtual SAN (vSAN)

Answer:

B, C, D

Question 4

Question Type: MultipleChoice

An architect put these statements into a design:

Horizon to integrate with current authentication solutions (directory services and two-factor authentication mechanisms) for internal and external access.

Desktop and application access and provisioning should be managed through current authentication mechanisms.

In which design category does the scenario fit?

Options:

- A- Requirement
- B- Assumption
- C- Risk
- D- Constraint

Answer:

A

Question 5

Question Type: MultipleChoice

Which protocol set is used to access physical workstations with high-end 3D graphics cards?

Options:

- A- Blast Extreme, PCoIP, RDP, RGS
- B- Blast Extreme, PCoIP, RDP
- C- Blast Extreme, PCoIP
- D- Blast Extreme, PCoIP, RGS

References:

Answer:

C

Question 6

Question Type: MultipleChoice

A company has a use case for instant clones and 3D NVIDIA video cards. The current environment consists of Horizon 7.0 and vSphere 6.5.

In which design standard category does the scenario fit?

Options:

- A- Assumption

- B- Requirement
- C- Risk
- D- Constraint

Answer:

B

Question 7

Question Type: MultipleChoice

Which three options need to be considered when implementing multiple vCenter Server in App Volumes 2.x? (Choose three.)

Options:

- A- Datastore names must be unique.
- B- Each vCenter must use the same credentials.
- C- Host names must be unique.
- D- Portgroups must be unique.
- E- Each vCenter must support Cross vCenter VMotion.

Answer:

A, C, D

Question 8

Question Type: MultipleChoice

A customer has made the decision to implement App Volumes. The customer has two data centers for High Availability. VMware recommends two different deployment modes for App Volumes in a multi-site implementation.

Which two requirements are common to all of the models? (Choose two.)

Options:

- A- Deploy a Microsoft SQL Cluster.
- B- Deploy a minimum of one App Volumes manager in each site.

- C- Ensure AppStack replication is configured.
- D- Reproduce Entitlements in both locations.

Answer:

C, D

Question 9

Question Type: MultipleChoice

A company's IT team wants to provide multiple Microsoft Office suite applications to end users without incurring any Windows desktop operating system licensing fees.

They also want each end users' Microsoft Office suite application customization settings and configuration changes preserved and restored when the end user logs off and logs back in.

Which two VMware technologies must they deploy to meet the requirements? (Choose two.)

Options:

- A- VMware Identity Manager
- B- VMware Horizon Enrollment Server
- C- VMware Horizon application pools
- D- VMware User Environment Manager
- E- VMware App Volumes Writable volumes

Answer:

C, D

Question 10

Question Type: MultipleChoice

An architect is asked to analyze poor performance on a Horizon VDI environment and provide recommendations on how to improve the user experience.

The architect documents:

- * An ESXi cluster of 4 nodes using vSAN
- * Each node has 128GB of RAM, four 500GB 10K HDD, one 200GB SSD

- * Each desktop is configured with 4GB of RAM and 2vCPUs
- * Each desktop has a working set of 20 GB
- * The environment peaks at 150 concurrent desktops in use

What action can the architect recommend?

Options:

- A- Add three additional 200GB SSD drives to each of the ESXi hosts.
- B- Add an additional 200GB SSD to each of the ESXi hosts.
- C- Reserve all RAM assigned to the virtual desktops.
- D- Increase the RAM assigned to the virtual desktops.

Answer:

D
