Question 1

Question Type: MultipleChoice

An administrator needs to configure new L2 Broadcast Domains.

Which NSX-T logical component should the administrator use to create these domains?

Options:

- A- Private Networks
- B- Firewalls
- C- Segments
- D- Gateways

Answer:

C

Question 2

Question Type: MultipleChoice

Which two components are part of the Data Plane in the NSX-T Data Center Architecture?
(Choose two.)

Options:

- A- NSX Controller
- B- Edge Node
- C- NSX Container Plugin (NCP)
- D- Hypervisor
- E- NSX Manager

Answer:

B, D

Question 3

Question Type: MultipleChoice

A customer needs to secure its micro-services.

Which feature does NSX Data Center offer to help achieve this requirement?

Options:

- A- Micro segmentation enforcement at container level
- B- Integration with third-party vendors
- C- Service Insertion for Containers
- D- Easy Operation of Containers

Answer:

A

Question 4

Question Type: MultipleChoice

What is the benefit of connecting segments to Tier-1 Gateways?

Options:

- A- Enhanced cloud consumption model
- B- Enhanced micro-segmentation model
- C- Enhanced East/West communication
- D- Enhanced North/South communication

Answer:

C

Question 5

Question Type: MultipleChoice

A customer needs a solution to provide Layer 2 connectivity between vSphere and KVM hypervisors.

Which VMware solution should the customer use?

Options:

- A- NSX Service Mesh
- B- NSX Cloud
- C- NSX-T Data Center
- D- NSX Intelligence

Answer:

C

Question 6

Question Type: MultipleChoice

Which two network connection types can be enabled in ESXi? (Select two.)

Options:

- A- Connecting VMware DRS services to the physical network
- B- Connecting hybrid services to the physical network
- C- Connecting virtual machines to the physical network and to each other
- D- Connecting VMkernel services to the physical network
- E- Connecting cluster services to the physical network and to each other

Answer:

C, D

Question 7

Question Type: MultipleChoice

Which vSphere feature protects virtual machines against a hardware failure?

Options:

- A- vSphere Distributed Resource Scheduler
- B- vSphere vMotion

- C- vSphere Distributed Power Management
- D- vSphere High Availability

Answer:

D

Question 8

Question Type: MultipleChoice

A customer needs help detecting lateral threat movement on east-west network traffic across multi-cloud environments.

Which solution should the customer use?

Options:

- A- VMware HCX
- B- NSX SD-WAN
- C- NSX Distributed IDS
- D- NSX Intelligence

Answer:

C

Question 9

Question Type: MultipleChoice

A customer needs a solution to optimize East/West traffic while maintaining an overlay-based L3 communication.

Which NSX-T Data Center feature can the customer use to achieve this requirement?

Options:

- A- Forwarding Policies
- B- Layer 2 Bridging
- C- Tier-0 Gateways

D- Tier-1 Gateways

Answer:

C

Question 10

Question Type: MultipleChoice

A customer requires visibility and dynamic security policy enforcement in an NSX-T Data Center environment.

Which product should the customer use?

Options:

- A- NSX Policy
- B- NSX Cloud
- C- NSX Distributed IDS
- D- NSX Intelligence

Answer:

A

Question 11

Question Type: MultipleChoice

What are two characteristics of a Software Defined Networking (SDN) solution? (Choose two.)

Options:

- A- It allows workloads to be placed and migrated anywhere in the network.
- B- It is dependent on the underlying physical routers and switches.
- C- It is decoupled from the physical networking infrastructure.
- D- It contributes to layer 2 network sprawl.
- E- It restricts the placements of virtual machines and containers.

Answer:

A, C

Question 12

Question Type: MultipleChoice

Which three VMware products help secure the software-defined data center (SDDC)? (Select three.)

Options:

- A- VMware NSX
- B- VMware vSphere Replication
- C- VMware Deep Security
- D- VMware SecDevOps
- E- VMware Carbon Black
- F- VMware AppDefense

Answer:

A, C, E

Question 13

Question Type: MultipleChoice

Which consumption method should an administrator use to create NSX-T objects from code?

Options:

- A- The NSX-T Web GUI
- B- A dedicated NSX-T Fat Client
- C- The REST API
- D- vCenter Server

Answer:

C
